

LIST OF TABLES

Table No.	Title	Page No.
1.	Regional diets selected for analysis	33
2.	Formulation of the food mixes	53
3.	Socio- economic background of the households	75-76
4.	Frequency of consumption of regional diets for breakfast	88
5.	Regional diets for lunch as variety rice	89
6.	Regional diets as vegetarian side dishes	0
7.	Foods prepared and consumed during festivals	91
8.	Foods consumed during minor diseases	93
9.	Foods avoided during minor diseases	94
10.	One day's meal pattern of the households	95
11.	Mean food intake of the adolescent girls	96
12.	Total iron and zinc content of cereal based diets	99
13.	Total iron and zinc content of pulses and legume preparations	101
14.	Total iron and zinc content of vegetable preparations	102
15.	Total iron and zinc content of green leaf preparations	103
16.	Total iron and zinc content of roots and tuber preparations	104
17.	Total iron and zinc content of non-vegetarian preparations	105
18.	Total iron and zinc content of convenience food preparations	106
19.	Total iron and zinc content from one days' diet of adolescent girl	107
20.	<i>In-vitro</i> bioaccessibility of iron and zinc from selected regional diets	110
21.	<i>In-vitro</i> bioaccessibility of iron and zinc from side dishes	113

Table No.	Title	Page No.
22.	<i>In-vitro</i> bioaccessibility of iron and zinc from different vegetable salads	116
23.	<i>In-vitro</i> bioaccessibility of iron and zinc from meals	117
24.	Macronutrient content of the ready to eat foods	120
25.	Micronutrient content of the ready to eat foods	121
26.	<i>In-vitro</i> bioaccessibility of iron and zinc from the ready to eat foods	124
27.	Sensory evaluation of ready to eat foods	125
28.	Shelf – life evaluation of the ready to eat foods	128
29.	Cost of ready to eat foods	129
30.	Background information of the adolescent girls	132
31.	Food habits of adolescent girls	135
32.	Frequency of consumption of fast foods	136
33.	Classification of adolescent girls based on BMI	139
34.	Biochemical profile of the adolescent girls	140
35.	Clinical symptoms of adolescent girls	141
36.	Food frequency scores obtained for various food items	142
37.	Frequency of use of foods groups	143
38.	Impact of interventions on the iron nutriture of the adolescent girls	145
39.	Impact of nutrition education on the knowledge, attitude and practice of adolescent girls	148
40.	Association between blood haemoglobin, serum ferritin and iron intake	150

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1.	Research design of phase – I	32
2.	Steps involved in the standardization of regional diets and convenience foods	36
3.	Steps involved in the <i>in vitro</i> bioaccessibility of iron and zinc	43
4.	Research design of Phase - V and VI	63
5.	Research design of the study	73
6.	Distribution of households based on type of family	78
7.	Classification of households based on income	79
8.	Distribution of households based on food habits	80
9.	Frequency of consumption of ragi	82
10.	Frequency of consumption of pulses	83
11.	Frequency of consumption of roots and tubers	84
12.	Frequency of consumption of green leafy vegetables	85
13.	Frequency of consumption of fruits	86
14.	Frequency of consumption of meat and meat products	87
15.	Iron and zinc content of cereal based preparations	100
16.	Total iron and zinc content from one days diet of adolescent girl	108
17.	In-Vitro Bioaccessibility of iron and zinc from selected regional diets	112
18.	Phytate content of the ready to eat foods	123
19.	Oxalate content of the ready to eat foods	123
20.	Overall acceptability of ready to eat foods	126

FIGURE NO.	TITLE	PAGE NO.
21.	Classification of the respondents based on food habits	134
22.	Frequency of consumption of fast foods by adolescent girls	135
23.	Classification of Adolescent girls based on monthly income	138

LIST OF PLATES

PLATE NO.	TITLE	PAGE NO.
1	Household consumption pattern of India	11
2	Absorption and metabolism of iron in the body	13
3	Absorption and metabolism of zinc in the body	16
4	Locale of the study	28
5	Collection of data from the households	31
6	One day's diet of households of Chennai district	37
7	One day's diet of households of Trichy district	38
8	One day's diet of households of Coimbatore district	39
9	One day's diet of households of Kanyakumari district	40
10	Processing of ingredients	49
11	Variations of Ready to eat foods	54
12	Evaluations of the ready to eat foods	56
13	Formulated the ready to eat foods	57
14	Conduct of in vivo study	60-61
15	Assessment of nutritional status	72
16	Total plate count of the ready to eat foods	129

LIST OF APPENDIX

APPENDIX NO.	TITLE	PAGE NO.
1	Schedule to elicit information regarding personal and social characteristics of the households	
2	Procedures for estimation of nutrients	
3	Schedule to assess the sensory evaluation of ready to eat foods	
4	Schedule to elicit information regarding personal and social characteristics adolescent girls	
5	Form for clinical examination	
6	Nutritional potentials of the regional diets	
7	Glossary of regional diets
