CHAPTER	TITLE	PAGE NO.
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF PLATES	
	LIST OF APPENDICES	
<b>1</b>	<b>INTRODUCTION</b>	<b>1</b>
<b>2</b>	<b>REVIEW OF LITERATURE</b>	<b>10</b>
	2.1 Natural Fibres – Properties and their Importance	10
	2.2 Spinning, Weaving and Processing of Natural Fibres	14
	2.3 Importance of Blends and Mixture Fabrics	19
	2.4 Nonwovens – Needle Punching	19
	2.5 Advantages and Disadvantages of Woven and Nonwoven Fabrics	21
	2.6 Applications of Woven and Nonwoven Fabrics in Different Fields of Technical Textiles	21
<b>3</b>	<b>EXPERIMENTAL PROCEDURE</b>	<b>30</b>
	3.1 Collection, Extraction and Processing of <i>Agave americana</i> Fibres	30
	3.2 Spinning of <i>Agave americana</i> , Hemp and Jute Fibres, Scouring and Bleaching of Yarns	34
	3.3 Fabrication of <i>Agave americana</i> , Hemp and Jute Yarns by Weaving and their Processing	36
	3.4 Fabrication of <i>Agave americana</i> , Hemp and Jute Fibres by Needle Punching	40
	3.5 Nomenclature of Yarn and Fabric Samples	46

CHAPTER	TITLE	PAGE NO.
	3.6 Ribbed Woven Fabrics in Cloth Tex	48
	3.7 Ribbed and Plain Woven Fabrics in Selected Areas of Home Tex	50
	3.8 Woven and Needle Punched Fabrics as Mulching Sheets in Agro Tex	52
	3.9 Woven and Needle Punched Fabrics as Screens and Separators for Filtration in Geo Tex	56
	3.10 Economics of Woven and Needle Punched Fabrics	65
	3.11 Evaluation	65
<b>4</b>	<b>RESULTS AND DISCUSSION</b>	<b>90</b>
	4.1 Fibre Analysis – <i>Agave americana</i>	90
	4.2 Yarn Analysis	93
	4.3 General Properties of Woven Fabrics	100
	4.4 Analysis of Needle Punched Fabrics	132
	4.5 Evaluation of Ribbed Woven Fabrics as Cloth Tex	139
	4.6 Evaluation of Woven Fabrics as Home Tex	151
	4.7 Evaluation of Woven and Needle Punched Fabrics as Mulch Sheets in Agro Tex	162
	4.8 Evaluation of Woven and Nonwoven Fabrics as Screens and Separators in Geo Tex	178
	4.9 Evaluation of Selected Fabric Structure for Geotex	195
	4.10 Economics of Woven and Nonwoven Fabrics	195
<b>5</b>	<b>SUMMARY AND CONCLUSION</b>	<b>196</b>
	<b>BIBLIOGRAPHY</b>	
	<b>APPENDICES</b>	

## LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
I	Physical Properties of Hemp, Sisal and Jute Fibres	11
II	Fibre Properties	11
III	Recipe Used for Scouring of Fibres	32
IV	Recipe Used for Bleaching of Fibres	34
V	Recipe Used for Softening of Fibres	41
VI	Nomenclature for Spun and Treated Yarn Samples	46
VII	Nomenclature for the Woven Original and Treated Fabric Samples	46
VIII	Nomenclature for the Ribbed and Plain Woven Cotton <i>Agave americana</i> Fabric Samples	47
IX	Nomenclature for Needle Punched Fabric Samples	47
X	Nomenclature for Filtration Proportions, Media, Screens and their Combinations	48
XI (a)	Hydraulic Efficiency of Different Proportions of GCS Filters at Inflow Rate of 0.05 L / S	61
XI (b)	Sediment Load Reduction of Different Proportions of GCS Filters at Inflow Rate of 0.05 L / S	61
XII	Fibre Characteristics Based on Various Stages of Maturity	92
XIII	Chemical Constituents of <i>Agave americana</i> Fibres (%)	92
XIV	Visual Assessment of Original and Treated <i>Agave americana</i> , Hemp and Jute Yarn Samples	93
XV	Strength, Elongation and Breaking Tenacity of Original and Treated <i>Agave americana</i> , Hemp and Jute Yarns	95
XVI	Single TPI of Original and Treated <i>Agave americana</i> , Hemp and Jute Yarn Samples	96
XVII	Imperfections in the Original and Treated <i>Agave americana</i> , Hemp and Jute Yarn Samples	97
XVIII	Yarn Diameter of Original and Treated <i>Agave americana</i> , Hemp and Jute Yarn Samples	98
XIX	Yarn Count of Original and Treated <i>Agave americana</i> , Hemp and Jute Yarn Samples	99
XX	Suggestions for Product End Uses	100

TABLE NO.	TITLE	PAGE NO.
XXI	Strength and Elongation of Original and Treated Woven Samples in Warp Direction	101
XXII	Strength and Elongation of Original and Treated Woven Samples in Weft Direction	105
XXIII	Fabric Count and Cloth Cover Factor of Original and Treated Woven Samples	109
XXIV (a)	Weight (GSM) of Original and Treated Woven Samples	111
XXIV (b)	Analysis of Variance of Weight of Woven Samples	111
XXV (a)	Thickness (mm) of Original and Treated Woven Samples	113
XXV (b)	Analysis of Variance for Thickness of Woven Samples	113
XXVI	Dynamic Perforation Cone Drop Test of Woven Samples (mm)	114
XXVII	Abrasion Resistance of Woven Samples	115
XXVIII (a)	Stiffness (cm) of Original and Treated Woven Samples	115
XXVIII (b)	Analysis of Variance for Stiffness of Woven Samples	116
XXIX	Seam Strength, Strain and Seam Efficiency of Woven Fabric Samples	117
XXX (a)	Moisture Regain (%) of Original and Treated Woven Samples	118
XXX (b)	Analysis of Variance for Moisture Regain of Woven Samples	119
XXXI	Dimensional Change (%) of Fabrics in Warp and Weft Directions	120
XXXII (a)	Wicking (cm) of Original and Treated Woven Samples	121
XXXII (b)	Analysis of Variance for Wicking of Woven Samples	121
XXXIII (a)	Sinking (Seconds) of Original and Treated Woven Samples	123
XXXIII (b)	Analysis of Variance for Sinking Test of Woven Samples	123
XXXIV (a)	Absorbency (Seconds) of Woven Samples	125
XXXIV (b)	Analysis of Variance for Absorbency of Woven Samples	125
XXXV	Weight Loss of Soil Buried Woven Samples	128

TABLE NO.	TITLE	PAGE NO.
XXXVI	Bacterial and Fungal Colonies	128
XXXVII	Bursting Strength of Needle Punched Samples	132
XXXVIII	Dynamic Perforation Cone Drop Test of Nonwoven Samples	132
XXXIX	Seam Strength of Needle Punched Samples	133
XL	Fabric Weight and Thickness of Needle Punched Samples	134
XLI	Stiffness of Needle Punched Fabric Samples in Machine and Cross Directions (cm)	135
XLII	Water Absorbency and Retention Capacity in Needle Punched Samples	136
XLIII	Air Permeability in Needle Punched Samples	137
XLIV	Moisture Regain in Needle Punched Samples	137
XLV	Thermal Conductivity of Needle Punched Fabric Samples	138
XLVI	Weight Loss of Soil Buried Nonwoven Fabric Samples	138
XLVII	Bacterial and Fungal Colonies	138
XLVIII	Visual Evaluation of Original, Scoured and Bleached Ribbed Woven Samples	139
XLIX	Subjective Evaluation of Dyed, Fragrant Finished and Wear Studied Samples	140
L	Wear Study Evaluation of the Over Coat	141
LI	Colour Fastness of Ribbed Woven Lac Dyed Samples Before and After Wear	142
LII	Properties of Ribbed Woven Original, Treated and Wear Studied Over Coat Samples	144
LIII	Visual Assessment Ratings of Ribbed Woven and Plain Woven Fabric Samples Before and After Wear Study	151
LIV	Colour Fastness of Ribbed and Plain Woven Dyed Samples Before and After Wear	152
LV	Properties of Cotton – <i>Agave americana</i> Ribbed Woven Original, Processed and Wear Studied Runner Sample	153
LVI	Physical and Comfort Properties of Plain Woven Original, Processed and Wear Studied Rug Sample	158

TABLE NO.	TITLE	PAGE NO.
LVII	Effect of Woven and Nonwoven Agro Textiles as Mulch Sheet on Soil Moisture Content (%)	164
LVIII	Effect of Woven and Nonwoven Agro Textiles as Mulch Sheet on Soil Temperature at 15 cm Depth (°C)	166
LIX	Effect of Woven and Nonwoven Agro Textiles as Mulch Sheet on Soil Temperature at 30 cm Depth (°C)	168
LX	Statistical Analysis of Soil Moisture and Temperature in Mulched and Unmulched Plots	170
LXI	Presence of Macro and Micro Nutrients in Woven and Nonwoven Mulched Plots Over Unmulched Plot and Pre Experiment Soil Sample	172
LXII	Weed Suppression in Woven and Nonwoven Mulched Plots Over Unmulched Plot (%)	174
LXIII	Observation of Vegetation	175
LXIV	Visual Evaluation of Wear Studied Woven and Nonwoven Samples	177
LXV (a)	Evaluation of Physical Parameters with various Woven Screens, Media and Proportions	178
LXV (b)	Statistical Analysis for Physical Parameters of Filtered Water with Woven Screens	181
LXVI (a)	Evaluation of Physical Parameters with Nonwoven Screens, Media and Proportions	183
LXVI (b)	Statistical Analysis for Physical Parameters of Filtered Water with Nonwoven Screens	183
LXVII (a)	Chemical Filtration Efficiency of Selected Combinations Using Woven Screens (%)	186
LXVII (b)	ANOVA for Physical Versus Chemical Filtration Efficiency of Selected Combinations Using Woven Screens	188
LXVIII (a)	Evaluation of Filtration Efficiency of Chemicals with Selected Combinations Using Nonwoven Screens (%)	189
LXVIII (b)	ANOVA for Physical Versus Chemical Filtration Efficiency of Selected Combinations Using Nonwoven Screens	192
LXIX	Filtration Efficiency of Physico-Chemical Parameters with Hemp – <i>Agave americana</i> Screen	193
LXX	Geotextile Properties of Hemp- <i>Agave americana</i> Woven Fabric Sample	195

## LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	Flow Chart of the Experimental Procedure	31
2	Schematic Diagram of Needle Punching Machine	45
3	Layout of the Mulch Sheets Laid on Soil Beds	55
4	Flow Chart for Filtration Process	58
5a	Diagrammatic Representation of the Filter	60
5b	Diagrammatic Representation of the Filter with Transparency	60
6	Strength and Elongation of Original and Treated Woven Samples in Warp Direction	102
7	Strength and Elongation of Original and Treated Woven Samples in Weft Direction	106
8	Wicking of Original and Treated Woven Samples	126
9	Sinking of Original and Treated Woven Samples	126
10	Absorbency of Woven Fabrics	126
11	Properties of Ribbed Woven Original, Treated and Wear Studied Over Coat Samples	145
12	Properties of Cotton- <i>Agave americana</i> Ribbed Woven Original, Processed and Wear Studied Runner Samples	154
13	Properties of Cotton- <i>Agave americana</i> Plain Woven Original, Processed and Wear Studied Rug Sample	159
14	Effect of Woven and Nonwoven Agro Textiles as Mulch Sheet on Soil Moisture Content	165
15	Effect of Woven and Nonwoven Agro Textiles as Mulch Sheet on Soil Temperature at 15 cm Depth	167
16	Effect of Woven and Nonwoven Agro Textiles as Mulch Sheet on Soil Temperature at 30 cm Depth	169
17	Evaluation of Physical Parameters with Various Woven Screens, Media and Proportions	180
18	Evaluation of Physical Parameters with Various Nonwoven Screens, Media and Proportions	184
19	Chemical Filtration Efficiency of Selected Combinations Using Woven Screens (%)	187
20	Chemical Filtration Efficiency with Selected Combinations Using Nonwoven Screens (%)	191

## LIST OF PLATES

PLATE NO.	TITLE	PAGE NO.
1	Plants, Leaves and Flowers of <i>Agave americana</i> and Fibre Extraction	33
	a <sub>1</sub> . <i>Agave americana</i> Plant	33
	a <sub>2</sub> Spines of <i>Agave americana</i> Leaves	33
	a <sub>3</sub> Flowers of <i>Agave americana</i> Plant	33
	a <sub>4</sub> Bloomed Flowers of <i>Agave americana</i> Plant	33
	b. Cutting of the Leaves from <i>Agave americana</i> Plant	33
	c. Decorticator	33
	d. Decorticating Process	33
2.	Spinning of Fibres	37
	a. Emulsion Plant Softener	37
	b. Carding Machine	37
	c. Drawing Machine I	37
	d. Drawing Machine II	37
	e. Drawing Machine III	37
	f. Spinning Machine	37
	g. Cop Machine	37
	h. <i>Agave americana</i> , Jute and Hemp Yarns	37
3	Weaving Process	39
	a. Cone Winding	39
	b. Warp Preparation – I	39
	c. Warp Preparation – II	39
	d. Weaving Process	39
	e. Prepared Fabrics	39
4	Needle Punching Process – I	43
	a. Spraying Emulsion Over Fibres Using Hand Sprayer	43
	b. Mixing Fibres for Hand Batching	43
	c. Feeding of Softened Blended Fibres into the Breaker Card	43

PLATE NO.	TITLE	PAGE NO.
	d. Card Sliver obtained from Breaker Card	43
	e. Feeding the Card Sliver for Finisher Card	43
5	Needle Punching Process – II	44
	a. Cross Lapping of the Web in the Finisher Card	44
	b. Web Formation	44
	c. Needle Punching Machine	44
	d. Needles in the Needle Punching Machine	44
	e. Needle Punched Fabric from Needle Punching Machine	44
6	Over Coat and its Wear Study	51
7	Home Textile Applications	53
	a. Rug	53
	b. Tea Cup Placemat	53
	c. Place Mat and Table Napkins	53
	d. Table Cloth	53
	e. Table Napkin	53
	f. Table Runner	53
8	Mulching Process and Plant Growth	57
	a. Laying of Mulch Sheets	57
	b. Packing of the Corners of Mulch Sheet	57
	c. Sowing of Seeds	57
	d. Plant Growth in the Mulched Plot	57
	e. Weed Growth Near the Mulched Plot	57
	f. Plants with Vegetables on Mulched Plot	57
9	Filter and Filtration Processes in Proportion 1:1:1	63
	a. Filter	63
	b. GCS Filter with Nonwoven <i>Agave americana</i> -Hemp Screens	63
	c. GCS Filter with Nonwoven <i>Agave americana</i> -Jute Screens	63
	d. GCS Filter with Nonwoven <i>Agave americana</i> Screens	63
	e. GCS Filter with Woven <i>Agave americana</i> -Jute Screens	63

PLATE NO.	TITLE	PAGE NO.
	f. Gravel/Coir Fibres/Sand with Woven Hemp- <i>Agave americana</i> Screens	63
10	Filtration Process	64
	a. Gravel/Coir Fibre/Sand with <i>Agave americana</i> - <i>Agave americana</i> Screens in Proportion 1:1:1	64
	b. GCS Filter with Woven <i>Agave americana</i> -Hemp Screens in Proportion 1:2:3	64
	c. GCS Filter with Woven <i>Agave americana</i> - <i>Agave americana</i> Screens in Proportion 1:2:3	64
	d. GCS Filter with Nonwoven <i>Agave americana</i> -Jute Screens in Proportion 1:2:3	64
	e. GCS Filter with Nonwoven <i>Agave americana</i> -Hemp Screens in Proportion 1:2:3	64
	f. GCS Filter with Woven <i>Agave americana</i> -Jute Screens in Proportion 1:2:3	64
11	Soil Testing and Weed Assessment	87
	a. Removal of Soil with Screw Agar for Testing	87
	b. Placing Soil Samples in Oven	87
	c. Weighing of Oven Dried Soil Samples	87
	d. Soil Temperature Measurement	87
	e. Weed Assessment	87
12	SEM Image of <i>Agave americana</i> Fibre	91
	a. Decorticated Fibre	91
	b. Scoured Fibre	91
	c. Bleached Fibre	91
13	Evaluation of Soil Buried Samples	130
	a. Bacterial Colonies at $10^{-5}$ Dilution	130
	b. Fungal Colonies at $10^{-4}$ Dilution	130
	c. SEM Image of <i>Agave americana</i> Fibre from Soil Buried Woven AA Sample	130
	d. SEM Image of Jute Fibre from Soil Buried Woven AJ Sample	130
	e. SEM Image of Hemp Fibre from Soil Buried Woven AH Sample	130

PLATE NO.	TITLE	PAGE NO.
14	Repellency on Treated and Untreated CAR Samples	131
	a. Oil Drop on Treated Fabric	131
	b. Oil Drop on Untreated Fabric	131
	c. Water Drop on Treated Fabric	131
	d. Water Drop on Untreated Fabric	131
	e. Water Droplets on Treated Fabric	131
15	SEM Image of Fibres from Wear Studied Mulched Fabric	179
	a. Jute Fibre from AJ	179
	b. <i>Agave americana</i> Fibre from AA	179
	c. Jute Fibre from AJN	179
	d. <i>Agave americana</i> Fibre from AAN	179
	e. Hemp Fibre from AHN	179

## LIST OF APPENDICES

APPENDIX NO.	TITLE
1	Confirmation Certificate for the Plant <i>Agave americana</i>
2	<i>Agave americana</i> Fibres
3	Yarn Samples
4	Woven Fabric Samples
5	Needle Punched Fabric Samples
6	Processed Woven Fabric Samples
7a	Physical and Chemical Properties of Soil
7b	Quality Parameters of Water Used for Irrigation
8	Interview Schedule to Elicit Information Regarding Awareness of Mulching Among Farmers in Selected Areas
9	Properties of Media Used for Filtration
10	Recipe of Dosed Water
11	Proforma Used for Visual Assessment of Original and Treated Yarn Samples
12a	Proforma Used for Obtaining Judges' Suggestions for Product Preference of Woven Structures
12b	Proforma Used for Visual Evaluation of Soil Buried Fabric Samples
13a	Composition of Nutrient Agar Medium
13b	Composition of Chloromphenicol Agar Medium
14a	Proforma Used for Visual Evaluation of Original and Treated Ribbed Woven Fabric Samples
14b	Proforma Used for Visual Evaluation of Lac Dyed Fragrant Finished and Wear Studied Samples
14c	Proforma Used to Elicit the Information From the Wearers about <i>Agave americana</i> -Cotton Over Coat
14d	Proforma Used for Visual Evaluation of Dyed and Wear Studied Samples
15	Weather Data During the Cropping Period
16	Yarn Test Results – I
17	Yarn Test Results – II
18a	Aqueous Liquid, Oil and Water Repellent Finished Fabric Sample (CAR)
18b	Result of Repellent Finished Ribbed Woven Fabric Structure

**APPENDIX NO.****TITLE**
