

**Biofertilizer mediated Remediation of Silk Dyeing
Industrial Effluent and its Effect on selected
Green Leafy Vegetables**

By

A.R. Sumayya

Supervisor

Dr. Sivagami Srinivasan

A thesis submitted to

Avinashilingam Institute for Home Science and Higher Education for Women,
Coimbatore – 641 043

In partial fulfillment of the requirement for the degree of
Doctor of Philosophy in Biotechnology

February, 2015

CERTIFICATE

This is to certify that the thesis entitled "**Biofertilizer mediated Remediation of Silk Dyeing Industrial Effluent and its Effect on selected Green leafy Vegetables**", submitted to Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, for the award of the degree of **Doctor of Philosophy in Biotechnology**, is a record of original research work done by **A.R. Sumayya** during the period of her study in the Department of Biochemistry, Biotechnology and Bioinformatics, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, under my supervision and guidance and the thesis has not formed the basis for the award of any Degree / Diploma / Associateship / Fellowship or similar title to any candidate of any University.

DECLARATION

I hereby declare that the matter embodied in this thesis entitled “**Biofertilizer mediated Remediation of Silk Dyeing Industrial Effluent and its Effect on selected Green Leafy Vegetables**”, is the result of investigations carried out by me in the Department of Biochemistry, Biotechnology and Bioinformatics, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, under the supervision and guidance of **Dr. Sivagami Srinivasan**, Professor, Department of Biochemistry, Biotechnology and Bioinformatics, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore and it has not been submitted for the award of any Degree / Diploma / Associateship / Fellowship etc., of any other University or Institute.

Signature of the Candidate

ACKNOWLEDGEMENT

*First and foremost, the author wishes to express her sincere and humble gratitude to the **God Almighty** for his grace and blessings showered in the entire study.*

*The author is pleased to record of her sincere gratitude to **Thiru. Dr. T. S. K. Meenakshi Sundaram**, Chancellor, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, for giving her the opportunity to carry out the study.*

*The author expresses her thanks to former Vice Chancellor **Dr. Saroja Prabhakaran** for her support during the study. The author expresses her reverential thanks to **Hony. Col. Dr. Sheela Ramachandran**, Vice Chancellor, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore for rendering benevolent support and encouragement given during the tenure of the study.*

*The author expresses her gratitude to **Dr. Gowri Ramakrishnan**, Former Registrar and **Dr. A. Venmathi**, Registrar-in-charge, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore for extending immense and all possible help for the smooth conduct of the study.*

*The author expresses her special gratitude to **Dr. R. Parvatham**, former Dean of Science and **Dr. A. Parvathy**, Dean of Science, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore for their valuable suggestions, inspiration and help given during the study.*

*The author expresses her deep sense of thanks to **Dr. S. Annapurani**, Professor and Head, Department of Biochemistry, Biotechnology and Bioinformatics, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore for her sustained support throughout the study.*

*The author expresses her deep and heartfelt thanks and gratitude to **Dr. Sivagami Srinivasan**, Professor, Department of Biochemistry, Biotechnology and Bioinformatics, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, for her enormous valuable suggestions, meticulous care, dynamic guidance, consistent inspiration and constructive motivation throughout the study. Without her timely advice, support and constant encouragement, this thesis would not have been brought out in the present form.*

*The author is deeply obliged to **Dr. G.P. Jeyanthi**, Professor of Biochemistry and Controller of Examinations, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, for her constant care and support throughout the study.*

*The author expresses her deep sense of thanks to **A. Lakshmi**, non teaching staff, Department of Biochemistry, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore, for her concrete support throughout the study.*

*The author expresses her sincere thanks to **all the teachers and friends** in the Department of Biochemistry, Biotechnology and Bioinformatics, Avinashilingam Institute for Home Science and Higher Education for Women, Coimbatore for their immense love and timely help during the study.*

*The author expresses her thanks to **Vincent Sagayaraj**, Research Analyst, St. Joseph College, Trichy, for rendering his help in performing the HPLC analysis.*

*The author is forever grateful to her **family members** for their immense love, support, co-operation without which, this work would not have seen the light of the day.*

Chapter No.	Title	Page No.
	List of Tables	(i)
	List of Figures	(iii)
	List of Plates	(vi)
1.0	Introduction	1
2.0	Review of Literature	8
3.0	Experimental Procedure	21
4.0	Results and Discussion	39
5.0	Summary and Conclusion	147
6.0	Bibliography	154
	Appendices	174
	Publications	212

List of Tables

Table No.	Title	Page No.
1	Analysis of physico-chemical parameters of silk dyeing effluent, phytohormones, proximate principles, minerals, antioxidants, pigments, soil analysis and histological studies	36
2	Biometric parameters of the five selected GLVs grown in fresh water	43
3	Qualitative analysis of phytochemical constituents of the five selected GLVs grown in fresh water	46
4	Production of phytohormones by selected biofertilizers	70
5	Qualitative analysis of the phytochemical parameters of the selected GLVs grown in 75% of the silk dyeing effluent	82
6	Bioassay test in fresh water and biotreated effluent	92
7	Qualitative analysis of the phytochemical constituents of the selected GLVs grown in biotreated effluent	100
8	Functional groups detected in the FT-IR spectra of different GLVs in different treatments	133
9	Compounds detected in the HPLC of the different GLVs in different treatments	144

(ii)

List of Figures

Figure No.	Title	Page No.
1	Flow diagram of the silk dyeing processes	12
2	Preliminary decolorization of the silk dyeing effluent by <i>Pseudomonas fluorescens</i> , <i>Azospirillum sp.</i> and <i>Rhizobium sp.</i>	67
3	Percentage decolorization of the silk dyeing effluent by <i>P. fluorescens</i> , <i>Azospirillum sp.</i> and <i>Rhizobium sp.</i> , with the co-substrate (glucose)	69
4	Physical characterisation of the silk dyeing effluent in untreated and biotreated effluent	89
5	Chemical characterisation of the untreated and biotreated silk dyeing effluent	90
6	Seed germination of the selected GLVs	97
7	Root length of the selected GLVs in different treatments	98
8	Shoot length of the selected GLVs as influenced by various treatments	99
9	Moisture content of the selected GLVs in different treatments	103
10	Ash content, crude fibre and cellulose of the selected GLVs in different treatments	104
11	Total carbohydrate and Total protein of the selected GLVs in different treatments	104
12	Mineral contents of the selected GLVs in different treatments	105
13	Superoxide dismutase activity of the selected GLVs in different treatments	108
14	Peroxidase activity of the selected GLVs in different treatments	109
15	Hydrogen peroxide scavenging activity and DPPH activity of the selected GLVs in different treatments	109
16	Total phenol levels of the selected GLVs in different treatments	110
17	Ascorbic acid levels of the selected GLVs in different treatments	111

Figure No.	Title	Page No.
18	Tocopherol levels of the selected GLVs in different treatments	111
19	Total chlorophyll of the selected GLVs in different treatments	113
20	Carotenoids of the selected GLVs in different treatments	113
21	Calcium in the soil of different treatments	115
22	Nitrogen, phosphorus and potassium in the soil of different treatments	115
23	Iron and manganese in the soil of different treatments	116
24	Copper and zinc in the soil of different treatments	116
25	UV visible spectra of the five selected GLVs	120
26	FT-IR spectrum of <i>B.juncea</i> grown in fresh water	121
27	FT-IR spectrum of <i>B.juncea</i> grown in crude effluent	122
28	FT-IR spectrum of <i>B.juncea</i> grown in biotreated effluent	123
29	FT-IR spectrum of <i>T.foenum</i> grown in fresh water	123
30	FT-IR spectrum of <i>T.foenum</i> grown in effluent	124
31	FT-IR spectrum of <i>T.foenum</i> grown in biotreated effluent	125
32	FT-IR spectrum of <i>A. polygonoides</i> grown in fresh water	125
33	FT-IR Spectrum of <i>A. polygonoides</i> grown in crude effluent	126
34	FT-IR spectrum of <i>A. polygonoides</i> grown in biotreated effluent	127
35	FT-IR spectrum of <i>A. tristis</i> grown in fresh water	128
36	FT-IR spectrum of <i>A. tristis</i> grown in crude effluent	128
37	FT-IR spectrum of <i>A. tristis</i> in biotreated effluent	129
38	FT-IR spectrum of <i>S. grandiflora</i> grown in fresh water	130
39	FT-IR spectrum of <i>S. grandiflora</i> grown in crude effluent	130
40	FT-IR spectrum of <i>S. grandiflora</i> grown in biotreated effluent	131
41	FT-IR spectrum of the selected dyes of silk dyeing effluent.	132
42	HPLC of <i>B.juncea</i> grown in fresh water	134
43	HPLC of <i>B.juncea</i> grown in crude effluent	134
44	HPLC of <i>B.juncea</i> grown in biotreated effluent	135
45	HPLC of <i>T.foenum</i> grown in fresh water	136

Figure No.	Title	Page No.
46	HPLC of <i>T. foenum</i> grown in effluent	136
47	HPLC of <i>T. foenum</i> grown in biotreated effluent water	137
48	HPLC of <i>A. polygonoides</i> grown in fresh water	138
49	HPLC of <i>A. polygonoides</i> grown in crude effluent	138
50	HPLC of <i>A. polygonoides</i> grown in biotreated effluent	139
51	HPLC of <i>A. tristis</i> grown in fresh water	139
52	HPLC of <i>A. tristis</i> grown in crude effluent	140
53	HPLC of <i>A. tristis</i> grown in biotreated effluent	140
54	HPLC of <i>S. grandiflora</i> grown in fresh water	141
55	HPLC of <i>S. grandiflora</i> grown in crude effluent	141
56	HPLC of <i>S. grandiflora</i> grown in biotreated effluent	142
57	Standard HPLC of pigments, alkaloid and monosaccharides	143
58	HPLC of silk dyeing industrial effluent	145
59	HPLC of biotreated effluent	146

List of Plates

Plate No.	Title	Page No.
1	Different processes involved in silk dyeing	14
2	Growth of the GLVs in fresh water	42
3	Histological studies of the selected GLVs	57
4	Bioassay test in fresh water and crude silk dyeing effluent	64
5	Cultures preserved to perform degradation	67
6	Preliminary studies on decolorization of the silk dyeing effluent in different concentrations by <i>P.fluorescens</i> , <i>Azospirillum sp.</i> , and <i>Rhizobium sp.</i>	68
7	Decolorization of the silk dyeing effluent with different concentrations by <i>P.fluorescens</i> , <i>Azospirillum sp.</i> , <i>Rhizobium sp.</i> , with co-substrate (glucose)	69
8	Production of IAA and GA ₃ by <i>Pseudomonas fluorescens</i> <i>Azospirillum sp.</i> in silk dyeing effluent	71
9	<i>Brassica juncea</i> grown in different concentrations of the silk dyeing effluent	72
10	<i>Trigonella foenum</i> grown in different concentrations of the silk dyeing effluent	74
11	<i>Amaranthus polygonoides</i> grown in different concentrations of the silk dyeing effluent	75
12	<i>Amaranthus tristis</i> grown in different concentrations of the silk dyeing effluent	77
13	<i>Sesbania grandiflora</i> grown in different concentrations of the silk dyeing effluent	78
14	Histological studies of GLVs grown in crude effluent	85
15	Bioassay test in fresh water and biotreated effluent	93
16	Green leafy vegetables grown in biotreated effluent	95
