

## BIBLIOGRAPHY

### Books :

Altman E. I (1993) , “ Corporate financial distress and bankruptcy : A complete guide to predicting and avoiding distress and profiting from bankruptcy”, Edition 2, John Wiley and sons, Inc, Newyork, pp 31-33

Anup Chatterjee (2006), “ Sixty years of Indian industry ; Growth, Reforms and outlook”, Eastern Book Corporation, New Delhi, pp 167-177

Baruch Lev (1974), “Financial statements analysis : A new approach”, Prentice Hall Inc, New Jersey, pp. 78-81

Cryer J and Miller R (1991), “ Statistics for business data analysis and modeling ”, PWS-KENT publishing Co, Boston, pp 77-78

Jolliffe I (1986), “ Principal component analysis”, Springer Verlag, Newyork, pp 111-113

Prasanna chandra (2001) , “Financial Management, Theory and Practice”, Edition 5, Tata Mcgraw Hill Publishing Co Ltd, New Delhi pp 1071-1085

Ramakanth, Sugan C Jain and Mathur N D (1993a) “Industrial sickness”, Pointer Publishers, Jaipur, pp 151-190

Ramakanth, Sugan C Jain and Mathur N D (1993b) “Management of Industrial sickness”, Pointer Publishers, Jaipur, pp 211-215

Sudarshan Lal (1979), “ How to prevent industrial sickness”, Sultan Chand and sons, New Delhi, pp 191-199

Srivatsava SS and Yadav R A (1986) “ Management and monitoring of industrial sickness”, Concept Publishing Company, New Delhi, pp 10-13.

Uma Kapila (2006), “ Indian economy since independence”, Edition 18, Academic foundation, New Delhi, pp 532-548

### **Journals :**

Aharony J, Jones C.P, Swary I (1980), “ An analysis of risk and return characteristics of corporate bankruptcy using capital market data”, The Journal of Finance, 35(4), pp 1001-1016

Altman E I (1968), “Financial ratios, Discriminant Analysis and the prediction of corporate bankruptcy”, The Journal of Finance, 23(9), pp 589-609

Altman E I , Haldeman R G and Narayanan P, (1977), “ Zeta Analysis : A new model to identify bankruptcy risk of corporations”, Journal of Banking and Finance, 23 (Spring), pp 29-54

Altman E I, Marco G and Varetto F (1994), “ Corporate distress diagnosis : Comparisons using linear discriminant analysis and neural networks ( the Italian experience)”, Journal of Banking and Finance , 18, pp 505-529

## **Working papers / discussion papers**

Back B, Laitinen T and Sere K., (1995) "Neural networks and bankruptcy prediction : funds flow accrual ratios and accounting data", Publications of Turku school of Economic and Business administration series, A-4, pp 111-137

Federation of Indian chamber of Commerce and Industry (1978), Workshop on Revival of sick firms.

Industrial Credit and Investment Corporation of India (1976), Annual Report on the working of industrial and commercial undertakings.

Neophytou E, Charitou A and Charalambus C (2001), "Predicting Corporate failure: Empirical evidence for the UK", University of Southampton.

Rodrick Dani and Arvind Subramaniam (2004), "From Hindu Growth to productivity surge : the mystery of the Indian growth transition", working paper No : 10376, National Bureau of Economic Research, Cambridge.

Shirata Cindy Yoshiko (1998) "Financial ratios as predictors of bankruptcy", Proceedings of the second Asian Pacific interdisciplinary research in Accounting Conference, August, pp 437-445

## **Reports:**

Economic Survey (2002-03), Ministry of Finance and Economic division, Government of India, 2, pp 118-124

Report of the study Team of the SBI on role of the bank in the effective growth of industries (1971), State Bank of India, p 25

Report on Trend and Progress of Banking in India (1978), Reserve Bank of India, 1, p IV: 8

Seventh Five Year Plan (1985-90), 11, Planning Commission, Government of India, pp 178-198

Tenth Five Year Plan (2002-07),1, Planning Commission, Government of India, pp 24-35

**Dissertations:**

Dwyer MD (1992), "A comparison of statistical techniques and artificial neural networks models in corporate bankruptcy prediction", unpublished Doctoral Dissertation, University of Wisconsin.

Jiang Y (1993), "Bankruptcy prediction – A non-parametric approach," unpublished Master's thesis, Carleton University, Canada.

McGurr PT (1996), "Failure prediction of retail firms through use of financial ratios", unpublished Doctoral Dissertation, Purdue University

NittayagaSetwat (1994), "A test of financial ratios and untransformed financial accounts for predicting bankruptcy", unpublished doctoral dissertation, University of Mississippi

Porwan Nunthapad (2000), "Application of Altman's and McGurr's bankruptcy prediction models to small retail firms: A comparative analysis", Published Doctoral Dissertation, Nova Southeastern University

Rahel Falk (2005), "Industrial sickness in Indian manufacturing industries", Published doctoral dissertation, Ruprecht-Karls University, Vienna

Rance R (1999), "The application of Altman's revised four variable  $Z^{11}$  score bankruptcy prediction model for retail firms and the influence of asset size and sales growth on their failure", Unpublished doctoral dissertation, Nova Southeastern University

Richard O Hanson (2002), “A study of Altman’s revised four variable Z<sup>11</sup> score bankruptcy prediction model as it applies to service industries”,  
Published doctoral dissertation, Nova Southeastern University

Thevhine Charles (2003), “A comparative examination of bankruptcy prediction: Altman’s MDA study Vs Lurther’s ANN study: A test of predictive strength between the two techniques”, Published doctoral dissertation, Nova Southeastern University
