

TABLE OF CONTENTS

CHAPTER NO	TITLE	PAGE NO
	ABSTRACT	viii
	TABLE OF CONTENTS	xi
	LIST OF FIGURES	xvii
	LIST OF TABLES	xx
	LIST OF ABBREVIATIONS AND SYMBOLS	xxiii
1	INTRODUCTION	1 – 17
	1.1 Preliminary	1
	1.2 COVID-19 and Pneumonia Disease	3
	1.2.1 COVID Disease	3
	1.2.2 Pneumonia Disease	4
	1.3 Early Disease Prediction	5
	1.3.1 Data pre-processing	5
	1.3.2 Feature selection	5
	1.3.3 Classification	6
	1.4 Motivation	9
	1.5 Problem Definition	10
	1.6 Research Objectives	12
	1.7 Research Contribution	13
	1.8 Thesis Organization	15
	1.9 Chapter Summary	17
2	LITERATURE REVIEW	18– 42
	2.1 Introduction	18
	2.2 Learning Method Basis of Disease Prediction	18
	2.3 Disease Prediction Feature Selection Model	27
	2.4 Disease Classification Algorithms	29
	2.5 Research Gap	36
	2.6 Theoretical Framework of Proposed Techniques	38
	2.7 Contributions	38
	2.8 Chapter Summary	41
3	RESEARCH METHODOLOGY	43 – 51
	3.1 Introduction	43

CHAPTER NO	TITLE	PAGE NO
3.2	Existing Work	43
3.3	Proposed Methodology	44
	3.3.1 Proposed Additive Log Ratio Transformed One Hot Encoding-Based Data Preprocessing	45
	3.3.2 Proposed Zero Mean Feature Normalized Encoding Technique	45
	3.3.3 Proposed Nonlinear Sammon Projective Pattern Selection	45
	3.3.4 Proposed Tversky Similarity Indexed Distributive Feature Embedding Technique	45
	3.3.5 Proposed Statistical Correlative Targeted Projection Pursuit-Based Feature Selection	46
	3.3.6 Proposed Emphasis Perceptron Boosting Classification	46
	3.3.7 Proposed Time-Dependent Cox Regressive Levenberg–Marquardt Convolutional Neural Learning Technique	46
	3.3.8 Proposed Memetic Optimized U-Net Deep Learning Classifier	46
3.4	Experimental Setup	47
3.5	Performance Metric Analysis	47
	3.5.1 Preprocessing accuracy	48
	3.5.2 Preprocessing Time	48
	3.5.3 Space complexity	48
	3.5.4 Performance of Feature Selection Accuracy	48
	3.5.5 Study of Feature Selection Time	49
	3.5.6 Prediction Accuracy	49
	3.5.7 Precision	49
	3.5.8 Recall	49
	3.5.9 Specificity	50
	3.5.10 Prediction time	50
	3.5.11 F-measure	50

CHAPTER NO	TITLE	PAGE NO
	3.5.12 Percentage Improvement	50
	3.6 Chapter Summary	51
4	ADDITIVE LOG RATIO AND ZERO MEAN FEATURE NORMALIZED ENCODING BASED DATA PREPROCESSING FOR DISEASE IDENTIFICATION	52 – 65
	4.1 Introduction	52
	4.2 Proposed Additive Log Ratio Transformed One Hot Encoding-Based Data Preprocessing	54
	4.3 Proposed Zero Mean Feature Normalized Encoding Technique	58
	4.4 Experimental Setup	61
	4.5 Chapter Summary	65
5	NONLINEAR TVERSKY SIMILARITY AND STATISTICAL CORRELATIVE TARGETED PROJECTION BASED FEATURE SELECTION FOR DISEASE IDENTIFICATION	66 – 80
	5.1 Introduction	66
	5.2 Proposed Nonlinear Sammon Projective Pattern Selection Technique	68
	5.3 Proposed Tversky Similarity Indexed Distributive Feature Embedding (TSIDFE) Technique	72
	5.4 Proposed Statistical Correlative Targeted Projection Pursuit-Based Feature Selection	75
	5.5 Experimental Setup	78
	5.6 Chapter Summary	80
6	PERCEPTRON BOOSTING AND CONVOLUTIONAL NEURAL MEMETIC OPTIMIZED U-NET LEARNING FOR DISEASE PREDICTION	81 – 105
	6.1 Introduction	81
	6.2 Proposed Emphasis Perceptron Boosting Classification	84
	6.3 Time-dependent Cox Regressive Levenberg–Marquardt Convolutional Neural Learning Technique	86

CHAPTER NO	TITLE	PAGE NO
	6.4 Proposed Memetic Optimized U-Net Deep Learning Classifier	91
	6.4.1 K-fold Cross-Validation	92
	6.4.2 Memetic Optimized U-Net Deep Learning Model	93
	6.5 Experimental Setup	101
	6.6 Chapter Summary	104
7	ABLATION STUDY FOR OPTIMIZED MACHINE LEARNING AND DEEP LEARNING TECHNIQUES	106-124
	7.1 Introduction	106
	7.2 Experimental Setup	109
	7.2.1 Ablation Study for Preprocessing Models	109
	7.2.2 Ablation Study for Feature Selection Models	111
	7.2.3 Ablation Study for Classification Models	115
	7.3 Chapter Summary	123
8	INVESTIGATION ON NOVEL PREPROCESSING, FEATURE SELECTION, CLASSIFICATION TECHNIQUES USING DISEASE DATASET	125-138
	8.1 Introduction	125
	8.2 Performance Analysis	126
	8.2.1 Results of Preprocessing Methods	126
	8.2.2 Results of Feature Selection Methods	131
	8.2.3 Results of Classification Methods	133
	8.3 Chapter Summary	137
9	RESULTS AND DISCUSSION ON MACHINE AND DEEP LEARNING METHODS FOR DISEASE PREDICTION	139– 181
	9.1 Introduction	139
	9.2 Results and Discussion for Preprocessing	139
	9.2.1 Result of preprocessing accuracy	139
	9.2.2 Performance of Preprocessing Time	140
	9.2.3 Impact of Space complexity	140

CHAPTER NO	TITLE	PAGE NO
	9.2.4 Performance of Error Rate	140
	9.2.5 Performance of ROC Curve for preprocessing	143
9.3	Results and Discussion for Feature Selection	145
	9.3.1 Performance of Feature Selection Accuracy	145
	9.3.2 Study of Feature Selection Time	145
	9.3.3 Results of Space Complexity	146
	9.3.4 Impact of Error Rate	146
	9.3.5 Performance of ROC Curve for feature Selection	149
9.4	Results and Discussion for Classification	151
	9.4.1 Results of Prediction Accuracy	151
	9.4.2 Impact of Precision	151
	9.4.3 Performance of Recall	151
	9.4.4 Study of Specificity	152
	9.4.5 Analysis of Prediction time	152
	9.4.6 Examination of Kappa statistics	158
	9.4.7 Investigation of Receiver Operating Characteristic (ROC)	159
	9.4.8 Results of Area Under the Curve	161
	9.4.9 Statistical test	162
9.5	Results and Discussion for COVID-19 and RSNA Pneumonia Datasets	163
	9.5.1 Comparative Results of Classification without Preprocessing and Feature Selection Methods	164
	9.5.2 Comparative Outcomes of Classification with Preprocessing without Feature Selection Methods	166
	9.5.3 Comparative Outcomes of Classification without Preprocessing with Feature Selection Methods	168
	9.5.4 Comparative Results of Classification with Preprocessing and Feature Selection Methods	170
	9.5.5 Overall Classification Outcomes	172

CHAPTER NO	TITLE	PAGE NO
	9.6 Performance of Preprocessing, Feature Selection and Classification Techniques	174
	9.7. Chapter Summary	180
10	CONCLUSION AND FUTURE DIRECTIONS	182 – 185
	10.1 Conclusion	182
	10.2 Limitation and Future work	184
