

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
1	Area wise distribution of the population	16
2	Name of the tribal communities of Kerala State	18
3	The Recommended Dietary Allowance for adolescent girls	23
4	District-wise Distribution of Tribal Population in Kerala	45
5	Tribes in Wayanad	46
6	Tribes in Kannur	47
7	Plants selected for the nutrition garden	58
8	Age wise distribution of the selected tribal girls	75
9	Water resources	78
10	Availability of electricity	78
11	Socio economic profile	81
12	Monthly expenditure pattern	82
13	Status of the house	84
14	Education status of the parents of the selected tribal girls	87
15	Occupational status of the parents of the tribal girls	88
16	Distance to access the amenities	89
17	Mean height (for age) of the selected tribal girls	92
18	Weight (for age) of the selected tribal girls	93
19	Body Mass Index (BMI)	94
20	Clinical Profile	95
21	Mean macronutrient consumption	97

TABLE NO.	TITLE	PAGE NO.
22	Mean mineral Consumption	99
23	Mean vitamin Consumption	100
24	Food skipping pattern	103
25	Daily water consumption pattern	104
26	Frequency of food consumption among nontribal girls	104
27	Food consumption frequency among tribal girls	105
28	The menu followed in the Mid-Day Meal Programme	106
29	Age of puberty among the selected girls	108
30	Special foods included or avoided	109
31	Reasons for the inclusion and exclusion of food items	110
32	Sources of information among the selected tribal girls	111
33	Menstrual Discomforts of the selected tribal girls	112
34	Types of absorbent used by the tribal girls	114
35	Method of washing and drying the menstrual cloths	115
36	Skipping of school at the time of menstruation	116
37	Psychological commotion of selected tribal girls	117
38	Mean scores secured for nutritional variables by the selected tribal girls	119
39	Nutritional awareness of the selected tribal and nontribal tribal girls	119
40	One-way ANOVA for evaluating differences in nutritional knowledge level of the selected girls	120
41	Mean scores secured for reproductive health awareness by the selected girls	121
42	Reproductive and menstrual health awareness among the selected girls	122

TABLE NO.	TITLE	PAGE NO.
43	One-way ANOVA for evaluating differences in reproductive health awareness level of the selected girls	123
44	Plants selected for cultivation in the nutrition garden	125
45	Details regards the wild edible flora consumed by selected tribal families	126
46	Wild edible Mushrooms consumed by tribal families	127
47	Fruits, nuts and seeds consumed by the selected tribal girls	128
48	Edible roots and tubers consumed by tribal families	129
49	Fishes and mussels consumed by tribal families	130
50	Poultry foods consumed by selected tribal families	130
51	Animals consumed by tribal families	131
52	Frequency of commonly consumed plant foods	132
53.a	Phytochemical analysis of the selected wild edible flora. a	133
53.b	Phytochemical analysis of the selected wild edible flora. b	133
54	Elemental distribution of <i>Centella asiatica</i> .	134
55	Elemental distribution of <i>Hygrophila auriculata</i>	134
56	Elemental distribution of <i>Senna tora</i>	135
57	Elemental distribution of <i>Diplazium esculentum</i>	135
58	Elemental distribution of <i>Aalachappu</i>	135
59	Elemental distribution of <i>Alternanthera brasiliiana</i>	136
60	Elemental distribution of <i>Leucas zeylanica</i>	136
61	Elemental distribution of <i>Cassia tora</i>	136
62.a	Dietary pattern of the selected tribal girls (Aralam)	139
62.b	Dietary pattern of the selected subjects (Pulpally)	139

TABLE NO.	TITLE	PAGE NO.
63	Mean macronutrient intake of the selected tribal girls	141
64	Mean mineral intake of the selected tribal girls	147
65	Mean vitamin intake of the selected tribal girls	152
66	Mean height of the selected tribal girls	158
67	Mean weight of the selected tribal girls	160
68	Mean BMI of the selected tribal girls	161
69	Clinical symptoms of Anemia experienced by the selected tribal girls	163
70	One Way ANOVA on the clinical symptoms of anemia	164
71	Correlation between Iron Intakes with Clinical symptoms of Anemia	165
72	Effect of intervention on clinical symptoms of nutritional deficiencies	167
73	Pre-menstrual Symptoms experienced by the selected tribal girls	168
74	Dysmenorrheal symptoms	169
75	Dysfunctional Uterine Bleeding/ Menstrual disorders experienced by the selected tribal girls	170
76	Sunlight Exposure of the Selected Tribal girls	171
77	Daily exercise pattern of the selected tribal girls	171
78	Correlation between the lifestyle modification and dysmenorrhea among the selected tribal girls	173
79	Nutritional Knowledge Level	174
80	Attitude level on nutrition	175
81	Nutrition related practices	175
82	One-way ANOVA for evaluating the effect of nutritional intervention on nutritional knowledge of the selected tribal girls	176

TABLE NO.	TITLE	PAGE NO.
83	One-way ANOVA for evaluating the effect of nutrition intervention on nutritional attitude of the selected tribal girls	177
84	One-way ANOVA for evaluating the effect of intervention on nutritional practices among the selected tribal girls	178
85	Correlation between Knowledge, Attitude and Practice on nutritional aspects among the selected tribal girls	179
86	Knowledge on reproductive health among the selected tribal girls	180
87	Attitude on reproductive health among the selected tribal girls	180
88	Practices on reproductive health among the selected tribal girls	181
89	One-way ANOVA for evaluating the effect of intervention on reproductive health knowledge among the selected tribal girls	181
90	One-way ANOVA for evaluating the effect of intervention on reproductive health attitude among the selected tribal girls	182
91	One-way ANOVA for evaluating the effect of intervention on reproductive health attitude among the selected tribal girls	183
92	Correlation between Knowledge, Attitude and Practice on reproductive health among the selected tribal girls	184

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	Distribution of the menstrual discomforts	113
2	Psychological commotion	117
3	Differences in nutritional knowledge level of the selected girls	121
4	Differences in reproductive health awareness level of the selected girls	123
5	Energy consumption of the selected tribal girls	143
6	Protein intake of the selected tribal girls	144
7	Fat intake of the selected tribal girls	145
8	Calcium intake of the selected tribal girls	147
9	Iron intake of the selected tribal girls	148
10	Zinc consumption of the selected tribal girls	149
11	Magnesium consumption of the selected tribal girls	150
12	Beta-carotene consumption of the selected tribal girls	152
13	Thiamine intake of the selected tribal girls	153
14	Riboflavin intake of selected tribal girls	154
15	Niacin consumption of the selected tribal girls	155
16	Vitamin C intake of the selected tribal girls	156
17	Folate intake of the selected tribal girls	157
18	Difference between the height level before and after the intervention	159
19	Difference between the weight level before and after the intervention	160
20	Difference between the BMI level before and after the intervention	162
21	Changes in the clinical symptoms of Anemia	164
22	One-way ANOVA for evaluating the effect of nutritional intervention on nutritional knowledge of the selected tribal girls	176

FIGURE NO.	TITLE	PAGE NO.
23	One-way ANOVA for evaluating the effect of nutrition intervention on nutritional attitude of the selected tribal girls	177
24	One-way ANOVA for evaluating the effect of intervention on nutritional practices among the selected tribal girls	178
25	One-way ANOVA for evaluating the effect of intervention on reproductive health knowledge among the selected tribal girls	182
26	One-way ANOVA for evaluating the effect of intervention on reproductive health attitude among the selected tribal girls	183
27	One-way ANOVA for evaluating the effect of intervention on reproductive health attitude among the selected tribal girls	184

LIST OF PLATES

PLATE NO.	TITLE	PAGE NO.
1	Anthropometric Measurements and Clinical Examination	49
2	Selection and Distribution of Seeds and Seedlings	59
3	Vegetable Crops Grown in the Nutrition Garden	60
4	Selected Wild Edible Plants	62
5	Nutrition and Personal Hygiene Education	67
6	The Road to the Tribal Residential Area and Water Sources	76
7	Tribal Dressing, Ornaments, Tattoo	80
8	Types Of Houses Among Tribals	86
