CHAPTER NO.	TITLE	PAGE NO.
	LIST OF TABLES	x
	LIST OF FIGURES	xiii
	LIST OF PLATES	xv
	LIST OF APPENDICES	xvi
	ABSTRACT	xvii
1.	INTRODUCTION	1
2.	REVIEW OF LITERATURE	12
	2.1. Attention Deficit Hyperactivity Disorder (ADHD) -An Insight	13
	2.2. Neurodevelopment in children with ADHD	18
	2.3. Nutritional status of children with ADHD	25
	2.4. Food and dietary habits of children with ADHD	30
	2.5. Strategies to reduce ADHD symptoms and improve behaviour function	37
3.	METHODOLOGY	45
	3.1. Phase I - Background information of children with symptoms of Attention Deficit Hyperactivity Disorder (ADHD)	47
	3.1.1. Selection of area and children	47
	3.1.2. Formulation of the assessment tools	49
	3.1.3. Eliciting data on the demographic profile, socio-economic background, lifestyle and dietary pattern	51
	3.1.4. Assessment of the nutritional status and behaviour function of children	51
	3.2. Phase II - Formulation and standardization of micronutrient rich snacks	55
	3.2.1. Identification, selection and processing of foods rich in micronutrients	55
	3.2.2. Organoleptic evaluation of the micronutrients based snacks	57
	3.2.3. Assessment of quality parameters, nutrient content and microbial count of the formulate snacks	58
	3.3. Phase III – Development and Implementation of Intervention strategies	61
	3.3.1. Development of digital health intervention modules	61
	3.3.2. Development of Artificial Intelligence Integrated Dynamic Website	61

CHAPTER NO.	TITLE	PAGE NO.
	3.3.3. YouTube Videos	66
	3.3.4. Development of Nutrition education Aids for one-to-one telephonic counselling	67
	3.3.5. Dietary Modification	68
	3.3.6. Implementation of Intervention Strategies	68
	3.4. Phase IV - Impact Evaluation	69
	3.4.1. Changes in Anthropometric Measurements of children with ADHD	70
	3.4.2. Changes in Food and Nutrient Intake	70
	3.4.3. Changes in Behaviour Function	70
	3.4.4. Pre and Post – scores on Knowledge, Attitude and Practice (KAP) of caregivers	70
	3.5. Phase V - Statistical analysis	70
4.	RESULTS AND DISCUSSION	71
	4.1. General, Health and Nutritional Status of children with ADHD symptoms	71
	4.1.1. Socio-economic Background of children with ADHD symptoms	72
	4.1.2. Family History of ADHD related disorders	80
	4.1.3. Parental profile of the children	81
	4.1.4 Health profile of the child	90
	4.1.5. Relationship between ADHD Symptoms with demographic	97
	4.1.6. Clinical Symptoms of the Children	100
	4.1.7. Physical activity pattern	101
	4.1.8. Dietary pattern of the children	103
	4.1.9. Behaviour Function of children with ADHD symptoms	109
	4.1.10. Assessment of the Nutritional Status of the Children	111
	4.1.11. Mean Food Intake of the children	115
	4.1.12. Mean Nutrient Intake of the children	119
	4.2. Formulation and standardization of snacks	122
	4.2.1. Organoleptic evaluation of the micronutrients based snacks	122
	4.2.2. Quality Assessment of the formulated micronutrient based rich snacks	126
	4.2.3. Fatty Acid Composition of formulated snacks	139
	4.3. Development of Artificial Intelligence Integrated Dynamic Website	159

CHAPTER NO.	TITLE	PAGE NO.
	4.4. Impact evaluation of intervention	163
	4.4.1. Changes in Anthropometric Measurements of the Selected Children	163
	4.4.2. Changes in Behaviour functions of the children with ADHD symptoms	165
	4.4.3. Changes in food intake of the children with ADHD symptoms	166
	4.4.4. Changes in Mean Nutrient Intake	168
	4.4.5. Impact of Digital Health Intervention on Knowledge, Attitude and Practice (KAP) Scores of Caregivers	170
5.	SUMMARY AND CONCLUSION	175
