

CONTENTS

Chapter No.	Title	Page No.
	List of Tables	
	List of Figures	
	List of Appendices	
1	Introduction	1-10
2	Review of literature	11-41
2.1	Skin: A structural elucidation	11
2.2.	Wound formation and healing process	12
2.2.1.	Coagulation and haemostasis phase	13
2.2.2	Inflammatory phase	14
2.2.3.	Proliferative phase	14
2.2.4.	Remodelling of wound tissues	14
2.3.	Traditional medicine and ayurveda in wound healing	15
2.4.	Patents on herbal formulation for wound healing	16
2.5.	Phytochemicals and antioxidants	18
2.6.	Antioxidants in wound healing	20
2.7.	Nanotechnology in medicine	21
2.8.	Nanoparticles in wound healing	22
2.9.	Types of nanomaterials	22
2.10.	Liposomes	23
2.10.1.	Liposome – wound healing	24
2.11.	<i>Hydrophilla auriculata</i> – an overview	27
2.11.1.	Total metabolites and phytoconstituents	27
2.11.2.	Ethnobotanical uses	31
2.11.3.	Major pharmacological actions	31
2.11.3.1.	Toxicity studies	31
2.11.3.2.	Antimicrobial activities	32
2.11.3.3.	Nephroprotective activities	32

Chapter No.	Title	Page No.
2.11.3.4.	Hepatoprotective activities	33
2.11.3.5.	Antitumor/anticancer activities	34
2.11.3.6.	Antidiabetic activities	34
2.11.3.7.	Antioxidant and free radical scavenging activities	35
2.11.3.8.	Erythropoietic / haematinic effect	36
2.11.3.9.	Diuretic activities	36
2.11.3.10.	Antinociceptive activity	37
2.11.3.11.	Anti-inflammatory and antipyretic activity	37
2.11.3.12.	Wound healing activity	37
2.11.3.13.	Anti-urolithiatic and anti-infective activity	38
2.12.	Betulin – an overview	38
2.13.	Betulin in wound healing	39
3	Materials and Methods	42-52
3.1.	Preliminary phytochemical and antioxidant studies	42
3.1.1.	Collection of plants and authentication	42
3.1.2.	Preparation of plant powder and extraction	43
3.1.3.	Determination of physicochemical parameters	43
3.1.4.	Qualitative phytochemical analysis	43
3.1.5.	Free radical scavenging activities	43
3.1.5.1.	DPPH radical scavenging activity	43
3.1.5.2.	ABTS radical scavenging activity	44
3.1.5.3.	Ferric reducing power assay (FRAP)	44
3.1.6.	Antioxidant activity	44
3.1.6.1.	Estimation of catalase activity	44
3.1.6.2.	Estimation of peroxidase activity	45
3.1.6.3.	Estimation of superoxide dismutase activity	45
3.1.6.4.	Estimation of polyphenol oxidase activity	45
3.1.6.5.	Estimation of Glutathione-S-transferase	45
3.1.6.6.	Estimation of vitamin C	45

Chapter No.	Title	Page No.
3.1.6.7.	Estimation of α -tocopherol	46
3.1.6.8.	Estimation of flavonoids	46
3.2.	<i>In silico</i> studies	46
3.2.1.	LCMS analysis	46
3.2.2.	Retrieval of ligands and proteins	47
3.2.3.	Drug likeliness and physicochemical properties	47
3.2.4.	ADMET properties	47
3.2.5.	Bioactivity score	47
3.2.6.	Molecular docking	47
3.3.	Liposome synthesis and characterization	48
3.3.1.	Synthesis of liposomes	48
3.3.2.	Encapsulation efficiency of liposomes	48
3.3.3.	Spectral studies	48
3.3.3.1	Fourier Transform Infrared (FTIR) Spectroscopy	48
3.3.3.2.	X-Ray Diffraction (XRD)	48
3.3.3.3.	Transmission electron microscopy (TEM)	48
3.3.3.4.	Zeta potential	48
3.4.	Antibacterial activity, <i>in vitro</i> cytotoxicity, wound healing activity and <i>in vivo</i> studies	49
3.4.1.	Microorganisms	49
3.4.2.	Antibacterial activity	49
3.4.3.	Cytotoxicity study	49
3.4.3.1.	MTT assay	49
3.4.4.	Scratch assay	49
3.4.4.1.	Collagen I expression using flow cytometry	50
3.4.5.	<i>In vivo</i> studies	51
3.4.5.1	Excision model wound healing activity	51
3.4.5.2.	Measurement of wound contraction	51
3.4.5.3.	Parameters studied	51
3.4.6.	Statistical analysis	52

Chapter No.	Title	Page No.
4	Results	53-87
4.1.	Preliminary phytochemical analysis and antioxidant studies	53
4.1.1.	Physicochemical analysis	53
4.1.2.	Qualitative phytochemical screening	53
4.1.3.	Free radical scavenging activities	54
4.1.3.1.	DPPH assay	54
4.1.3.2.	ABTS assay	55
4.1.3.3.	FRAP assay	56
4.1.4.	Antioxidant activity	56
4.1.4.1	Enzymatic and non-enzymatic antioxidant activity	56
4.2.	<i>In silico</i> studies	58
4.2.1.	LCMS analysis of <i>H. auriculata</i> root	58
4.2.2.	Selection of ligands from LCMS profile	59
4.2.3.	Pubchem	60
4.2.4.	Drug likeliness	60
4.2.5.	ADMET Properties	61
4.2.6.	Bioactivity score	63
4.2.7.	Retrieval of target proteins	63
4.2.8.	Molecular docking analysis of the ligand with the target proteins	65
4.2.8.1.	Docking interaction between betulin and elastase	66
4.2.8.2.	Docking interaction between betulin and collagenase	67
4.2.8.3.	Docking interaction between chlorogenic acid and GSK3 β	67
4.2.8.4.	Docking interaction between gelatinase and kaempferol-7-O-Glucoside	68
4.3.	Liposome synthesis and characterization	70
4.3.1.	Synthesis of liposomes using <i>H. auriculata</i> root and the compound betulin	70
4.3.2.	Encapsulation efficiency	70
4.3.3.	Spectral characterization of the synthesized liposomes	71

Chapter No.	Title	Page No.
	4.3.3.1. FTIR	71
	4.3.3.2. XRD	72
	4.3.3.3. TEM analysis	74
	4.3.3.4. Zeta potential	75
4.4.	Antibacterial activity, <i>in vitro</i> cytotoxicity, wound healing activity and <i>in vivo</i> studies	76
	4.4.1. Antibacterial activity	76
	4.4.2. Cytotoxicity study	76
	4.4.2.1. MTT assay	76
	4.4.3. Scratch assay	79
	4.4.3.1. Effect of Liposomes encapsulated with <i>H. auriculata</i> treatment on collagen 1 expression	80
	4.4.4. <i>In vivo</i> studies	81
	4.4.4.1. Excision model wound healing activity	81
	4.4.4.2. Histopathology	83
	4.4.4.3. Wound healing biomarkers	85
	4.4.4.3.1. Effect of ointment on IL 6	85
	4.4.4.3.2. Effect of ointment on CRP	85
	4.4.4.3.3. Effect of ointment on procalcitonin	85
	4.4.4.4. Haematological parameters	86
	4.4.4.4.1. Effect of ointment on macrophages	86
	4.4.4.4.2. Effect of ointment on neutrophils	86
	4.4.4.4.3. Effect of ointment on T Lymphocytes	86
	4.4.4.4.4. Effect of ointment on platelet count	86
	4.4.4.4.5. Effect of ointment on ESR	86
5	Discussion	88-107
6	Summary and Conclusion	108-115
	Bibliography	116-156
	Appendices	157-165
	Publications	
	Plagiarism report
