II	Reference for 25-OH Vitamin D Levels	63
III	Reference for Serum Calcium Levels	63
IV	Background of the Muslim Families	80
V	Socio-economic Status among the Muslim Families	83
VI	Marital Status of the Muslim Women	85
VII	Vital Statistics of the Muslim Women	86
VIII	Educational Qualification of the Muslim Women	87
IX	Education Pattern of the Muslim Women	88
X	Occupational status among the Muslim Women	89
XI	Morbidity Pattern among the Muslim Women	90
XII	Prevalence of Chronic Illness	92
XIII	Health Related Practices	93
XIV	Dietary Pattern of the Muslim Women	95
XV	Skipping of Meals	97
XVI	Purchase and Consumption of Vitamin D Fortified Foods	99
XVII	Characteristics of Islamic Dress Code	102
XVIII	Practice and Duration of Islamic Dress	104
XIX	Pattern of Exposure	106
XX	Use of Parasol and Dress Cover	108
XXI	Physical Activity Pattern	110
XXII	Knowledge and Attitude on Vitamin D	113
XXIII	Association of Dress Code with Demography and	116

	Lifestyle Pattern	
XXIV	Association of Dress Code with Health and Knowledge	118
XXV	Association of Knowledge with Demography and Lifestyle Pattern	119
XXVI	Anthropometric Measurements	121
XXVII	Height of the Muslim Women	122
XXVIII	Body Mass Index of the Muslim Women	124
XXIX	Waist-hip Ratio of the Muslim Women	125
XXX	Clinical Signs and Symptoms	126
XXXI	Frequency of food Consumption among the Muslim Women	128
XXXII	Mean Food Intake of the Muslim Women	134
XXXIII	Mean Nutrient Intake of the Muslim Women	137
XXXIV	Association between Body Mass Index and Energy Intake	140
XXXV	Serum Vitamin D Levels of the Muslim Women	141
XXXVI	Serum Calcium Levels of the Muslim Women	142
XXXVII	Relationship of Serum Vitamin D Levels with Lifestyle and Demographic factors	143
XXXVIII	Relationship of Body Measures and Symptoms with Vitamin D Levels	145
XXXIX	Relationship of Nutrient Intake with Vitamin D Levels	147
XL	Vitamin D Fortified Foods Identified in the market	149
XLI	Calcium and Vitamin D Content of the Fortified Products (as specified in the label)	153
XLII	Calcium and Vitamin D Content of Fortified Egg and Milk	155
XLIII	Knowledge, Attitude and Practice among the Selected Muslim Women	159
XLIV	Impact of Digital Health Intervention and Telephonic Counselling on Knowledge of Vitamin D	161

XLV	Impact of Digital Health Intervention and Telephonic Counselling on Attitude towards Vitamin D	164
XLVI	Impact of Digital Health Intervention and Telephonic Counselling on Practices Enhancing Vitamin D	165
XLVII	Impact of Digital Health Intervention and Dietary Modification on Food Intake of the Muslim Women (20 -29 years)	169
XLVIII	Impact of Digital Health Intervention and Dietary Modification on Nutrient Intake of the Muslim Women (20 -29years)	171
XLIX	Impact of Digital Health Intervention and Dietary Modification on Food Intake of the Muslim Women (30 -39years)	173
L	Impact of Digital Health Intervention and Dietary Modification on Nutrient Intake of the Muslim Women (30 -39years)	175
LI	Impact of Digital Health Intervention and Dietary Modification on Food Intake of the Muslim Women (40 -45 years)	177
LII	Impact of Digital Health Intervention and Dietary Modification on Nutrient Intake of the Muslim Women (40 -45 years)	179
LIII	Feedback of Digital Health Intervention and Telephonic Counselling	181

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	Different types of Islamic Dress Practices among Muslim Women	15
2	Global Prevalence of Vitamin D Deficiency	28
