Enhancement of Cognitive Abilities among Learning Disabled

80_Recomm1endations

- Studies should involve parents and teachers as participant observer in order to carry on the benefit of the training continuously
- Further studies may include the peer trainers and find out the effect of the intervention
- A longitudinal study with students from all age groups should be experimented with.
- Studies should be conducted on teacher awareness and imparting ways
- to manage learning disability need to be assessed.
- To use qualitative or mixed methods designs to better understand the complex nature of learning disability.
