

LIST OF FIGURES

Figure No.	Title	Page No.
1	Formation of free radicals	10
2	Reactive oxygen and nitrogen reactive species	11
3	Mechanism of free radicals mediated damage	15
4	Oxidative stress and Disease	16
5	Antioxidants defense against free radicals	17
6	Intrinsic and Extrinsic Apoptotic pathway	23
7	Mechanisms pertaining to evasion of apoptosis and carcinogenesis	24
8	Methods of nanoparticle Synthesis	27
9	Characterization of nanoparticles	29
10	Applications of biologically synthesized nanoparticles	32
11	Nanotechnology based Drug delivery system	33
12	Mechanism of anticancer effect of silver nanoparticles	35
13	Apoptosis inducing pathway by p53, AKT, MAPK activation to suppress ROS generated by Ag-NPs	36
14	A proposed pathway for Ag-NPs induced ROS generation and apoptosis	37
15	Illustration of challenges in the delivery of cancer nanotherapeutics	38
16	Baseline display and Peak densitogram display for Phenols	57
17	Baseline display and Peak densitogram display for Flavonoids	59
18	Baseline display and Peak densitogram display for Alkaloids	61
19	Baseline display and Peak densitogram display for Tannins	63
20	GC-MS Analysis of ethanolic extract of <i>Tabebuia roseo-alba</i> leaves	65
21	DPPH radical scavenging assay	71
22	ABTS ⁺ radical scavenging assay	73
23	Hydroxyl radical scavenging assay	74
24	Hydrogen peroxide radical scavenging assay	76

Figure No.	Title	Page No.
25	Nitric oxide radical scavenging assay	77
26	Superoxide radical scavenging assay	79
27	Reducing power assay	80
28	Visual Characterization of AgNPs synthesized using <i>T. roseo-alba</i>	83
29	UV-VIS absorption spectra of ethanolic extract of <i>T. roseo-alba</i>	84
30	UV-VIS absorption spectra of AgNPs synthesized using <i>T. roseo-alba</i>	85
31	FTIR spectrum of <i>T. roseo-alba</i>	86
32	FTIR spectrum of AgNPs synthesized using <i>T. roseo-alba</i>	87
33	DLS image showing the size of the AgNPs synthesized using <i>T. roseo-alba</i>	89
34	Zeta potential analysis of AgNPs synthesized using <i>T. roseo-alba</i>	91
35	X-ray diffraction spectrum of AgNPs synthesized using <i>T. roseo-alba</i>	92
36	Energy dispersive X-ray spectrum of AgNPs synthesized using <i>T. roseo-alba</i>	94
37	SEM image of AgNPs synthesized using <i>T. roseo-alba</i>	95
38	TEM image of silver nanoparticle synthesized using <i>T. roseo-alba</i> at 5nm, 50nm and 100nm	96
39	Selected area electron diffraction pattern of elemental silver	97
40	Cytotoxic effect of the ethanolic extract of <i>T. roseo-alba</i> and its AgNPs by MTT assay	99
41	Flow cytometry analysis of A549 cells by double-labelling with Annexin V and PI dyes	101
42	Flow cytometric analysis of A549 cell lines after staining with JC1	104
43	DNA fragmentation by <i>T. roseo-alba</i> and its AgNPs	106
44	Western blotting analysis for caspase 3 expression on human lung cancer A549 cells treated with ethanolic extract of <i>T. roseo-alba</i>	107
45	Western blotting analysis for caspase 3 expression on human lung cancer A549 cells treated with silver nanoparticles of <i>T. roseo-alba</i>	108
46	Flow cytometric analysis of cell cycle distribution of A549 cells.	109

LIST OF PLATES

Plate No.	Title	Page No.
1	<i>Tabebuia roseo-alba</i>	40
2	HPTLC finger printing profile for phenols	57
3	HPTLC fingerprinting profile for Flavonoids	58
4	HPTLC fingerprinting profile for Alkaloids	61
5	HPTLC fingerprinting profile for Tannins	63
6	Docking interactions of reported phytoconstituents of <i>T. roseo-alba</i> with members of the Bcl-2 family – Bcl-2	114
7	Docking interactions of reported phytoconstituents of <i>T. roseo-alba</i> with members of the Bcl-2 family – Bcl-XL	115
8	Docking interactions of reported phytoconstituents of <i>T. roseo-alba</i> with proto-oncogene Mutant p53	117
9	Docking interactions of reported phytoconstituents of <i>T. roseo-alba</i> with Mutant <i>KRAS</i>	120
10	Docking interactions of reported phytoconstituents of <i>T. roseo-alba</i> with Mutant EGFR	121
