CHAPTER	TITLE	PAGE NO.
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF PLATES	
	LIST OF APPENDICES	
I	INTRODUCTION	1
II	REVIEW OF LITERATURE	10
	2.1 An Overview of Textile Industries	10
	2.2 Cotton as a Clothing Item	12
	2.3 Significance of Pretreatment in Processing Industries	14
	2.4 Role of Colour and Dyeing in Enhancing the Appeal of cotton	19
	2.5 Different Types of Dyes, their Classification, Characteristics and Extent of Use	21
	2.6 Different Types of Mordants and Mordanting Techniques	25
	2.7 Environmental Pollution	30
	2.8 Need for Improving the Efficiency of Natural Dyes	33
III	RESEARCH DESIGN	36
	3.1 Conduct of Survey	38
	3.1.1 Market Survey	38
	3.1.2 Household Survey	39
	3.2 Selection of the Fabric	41

CHAPTER	TITLE	PAGE NO.
3.3	Pretreatment of the Fabric	42
3.4	Preparation of Fabric for Dyeing	45
3.5	Conduct of Pilot Study	46
3.5.1	Selection of Dye Sources	46
3.5.2	Selection of Mordants and Mordanting Techniques	46
3.5.3	Modifying Metallic Mordants into Processed Form of Mordants	47
3.5.4	Extraction of the Dye Solution	48
3.6	Optimization of Dyeing Parameters	53
3.6.1	Concentration of Dye	53
3.6.2	Concentration of Mordants	54
3.6.3	Mordanting Time	54
3.6.4	Dyeing Time	54
3.6.5	Selection of Optimized Proportions of Dyeing variables for the Study	55
3.6.6	Procedure used for Actual Dyeing	58
3.7	Evaluation of the Dyed Samples	60
3.7.1	Subjective Evaluation	60
3.7.1a.	Visual Inspection	60
3.7.2	Objective Evaluation	60
3.7.2a.	Fabric Weight and Fabric Thickness	60
3.7.2b	Breaking Strength and Elongation of the Fabric	61
3.8	Conducting Wettability and Absorbency Test	62
3.8.1	Drop Test	62
3.8.2	Sinking Test	63
3.8.3	Capillary Rise Test	63

CHAPTER	TITLE	PAGE NO.
3.9	Colour Fastness Test	64
3.9.1	Effect of Sunlight and Washing on the Fabric	64
3.9.2	Effect of Wet and Dry Crocking and Wet and Dry Pressing	66
3.9.3	Effect of Perspiration on the Fabric – Colour Fastness to Perspiration	67
3.9.4	Colour Strength (K/S Values) of Dyed Samples	68
3.10	Assessing Allergic Reactions during Physical Contact with Human Skin	69
3.11	Studying the Physico-Chemical Characteristics of Natural dye Effluent	69
3.11.1	Potential Hydrogen (pH)	70
3.11.2	Total Suspended Solids (TSS) and Total Dissolved Solids (TDS)	70
3.11.3	Chemical Oxygen Demand (COD)	71
3.12	Studying the Effects of Effluents on Plant Growth	71
3.12.1	Selection of Plants	71
3.12.2	Collection of Seeds and soil	71
3.12.3	Conduct of Pot Culture Study	72
3.13	Biometric Observation of Plant Samples	72
3.13.1	Analysis of Growth Parameters of Plant Samples	72
3.13.2	Germination Percentage	72
3.14	Analysis of Soil Samples	73
3.14.1	Soil pH and Electrical Conductivity	73
3.14.2	Estimation of Nitrogen	73
3.14.3	Estimation of Phosphorous and Potassium	73
3.15	Analysis and Interpretation of Data	73

CHAPTER	TITLE	PAGE NO.
IV	RESULTS AND DISCUSSION	82
4.1	Findings of the Market Survey	83
4.2	Findings of the Household Survey	94
4.3	Evaluation of the Dyed Samples	102
4.3.1	Subjective Evaluation	102
4.3.2	Objective Evaluation	105
4.3.2.1	Fabric Weight	105
4.3.2.2	Fabric Thickness	112
4.3.2.3	Tensile Strength of the Fabric (Warp and Weft)	118
4.3.2.4	Elongation of the Fabric (Warp and Weft)	130
4.4	Findings of Wettability and Absorbency Tests	143
4.4.1	Drop Test	143
4.4.2	Sinking Test	149
4.4.3	Capillary Rise Test	156
4.5	Effect of Sunlight, Washing, Wet and Dry Crocking and Pressing and Perspiration on the Dyed Materials	162
4.6	Colour Strength (K/S Values) of Dyed Samples	165
4.7	Effect of Physical Contact of Natural Dyed Samples with Human Skin	167
4.8	Physico-Chemical Characteristics of Natural Dye Effluent with reference to Potential Hydrogen, Total Suspended Solids, Total Dissolved Solids and Chemical Oxygen Demand	168

CHAPTER	TITLE	PAGE NO.
4.9	Effect of Natural Dye Effluent on Plant Growth	170
4.9.1	Growth Parameter of Plant Samples	170
4.9.2	Vigour Index and Germination Percentage	174
4.9.3	Soil Composition Before and After the Experimental Period with reference to pH, Electrical Conductivity, Nitrogen, Phosphorus and Potassium	175
V	SUMMARY AND CONCLUSION	177

BIBLIOGRAPHY

APPENDICES

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
I	Optimization of Dye Concentration	55
II	Optimization of Mordant Concentration	56
III	Optimization of Dye Extraction, Mordanting and Dyeing Time	57
IV	Optimized Parameters Selected for the Study	57
V	The Nomenclature of the Dyed Samples	59
VI	Availability, Sale and Purchase of Synthetic Dyes in the Selected Shops	84
VII	Availability, Sale and Purchase of Natural Dyes with Type of consumers in the Selected Cities	87
VIII	Cost of Natural and Synthetic Dyes	89
IX	Details of Selected Textile Shops that Sell Natural Dyed Fabrics	90
X	Availability and Demand for Natural Dyed Fabrics	91
XI	Special Measures Adopted to Promote the Sale of Materials	92
XII	Reasons for Promoting Sale of Natural Dyed Materials	93
XIII	Information on General Family Background of Selected Home Makers	94
XIV	Person Responsible for the Purchase of Clothing/Furnishing Items for the Family	96
XV	Details on Awareness and Purchase of Natural Dyed Fabrics	97

TABLE NO.	TITLE	PAGE NO.
XVI	Factors Influencing the Purchase of Clothing / Furnishing Items and Frequency of Purchase	98
XVII	Preference for Natural Dyed and Synthetic Dyed Fabrics by Family Members	99
XVIII	Attitudes of the Homemakers Towards Natural Dyed Fabrics	102
XIX	Visual Inspection of Dyed Samples	103
XX	Fabric Weight of Original and Dyed Samples	106
XXI	Fabric Thickness of Original and Dyed Samples	112
XXII	Tensile Strength of Original and Dyed Samples (Warp)	118
XXIII	Tensile Strength of Original and Dyed Samples (Weft)	124
XXIV	Elongation of Original and Dyed Samples (Warp)	131
XXV	Elongation of Original and Dyed Samples (Weft)	137
XXVI	Drop Test Values for Original and Dyed Samples	143
XXVII	Sinking Test Values for Original and Dyed Samples	150
XXVIII	Capillary Rise Test Values for Original and Dyed Samples	156
XXIX	Colour Fastness of Original and Dyed Samples	163
XXX	Colour Strength (K/S) of Dyed Samples	165
XXXI	Effect of Physical Contact of Natural Dyed Samples with Human Skin	168
XXXII	Physico-Chemical Parameters of Natural and Reactive Dye Effluent	169

TABLE NO.	TITLE	PAGE NO.
XXXIII	Root Length of Cow Pea, Horse Gram and Green Gram Seedlings at Different Stages of Growth	171
XXXIV	Shoot Length of Cow Pea, Horse Gram and Green Gram Seedlings at Different Stages of Growth	172
XXXV	Effect of Natural Dye Effluent on Germination (%) and Vigour Index for Cow Pea, Horse Gram and Green Gram	174
XXXVI	Soil Composition Before and After the Experimental Period	176

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
I	Fabric Weight of Original and Dyed Samples	108
II	Fabric Thickness of Original and Dyed Samples	114
III	Tensile Strength of Original and Dyed Samples (Warp)	120
IV	Tensile Strength of Original and Dyed Samples (Weft)	126
V	Elongation of Original and Dyed Samples (Warp)	133
VI	Elongation of Original and Dyed Samples (Weft)	139
VII	Drop Test of Original and Dyed Samples	145
VIII	Sinking Test of Original and Dyed Samples	152
IX	Capillary Rise of Original and Dyed Samples	158

LIST OF PLATES

PLATE NO.	TITLE	PAGE NO.
I	Fabric Treated with Myrobalan	74
II	Selected Dyes	75
III	Selected Mordants	76
IV	Drop Test	77
V	Sinking Test	77
VI	Capillary Rise Test	77
VII	Overall view of Pot Culture Study	78
VIII	Root Length and Shoot Length of Cowpea, Horse gram and Green Gram	79
IX	Equipments Used (Spectro Photometer, Electronic Weighing Balance, Baty Thickness Tester and Tensile Strength Tester)	80
X	Equipments Used (Laundrometer, Crock Meter, Colour Difference Meter (CDM) and pH Meter)	81

LIST OF ANNEXURES

ANNEXURE NO.	TITLE
I	Interview Schedule (1) to Elicit Information on the Availability of Synthetic Dyes in Selected Shops of Coimbatore, Salem, Karur and Madurai
II	Interview Schedule (2) to Elicit Information on the Availability of Natural Dyes in Selected Shops of Coimbatore, Salem, Karur and Madurai
III	Interview Schedule (3) to Elicit Information on the Availability of Natural Dyed Fabrics in Selected Shops of Coimbatore, Salem, Karur and Madurai
IV	An Interview Schedule (3) to Elicit Information Regarding Preferences of Natural Dyed Fabrics Among Selected Families in Coimbatore, Salem, Karur and Madurai
V	Details of the Selected Fabric and Dyed Samples
VI	Proforma Used to Evaluate Dyed Samples
VII	Gray Scale Used to Evaluate the Dyed Samples
VIII	Phosphate ECE – B Detergent Powder used for Washing Test
