

CONTENTS

CHAPTER No.	TITLE	PAGE No
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF APPENDICES	
1	INTRODUCTION	1
2	REVIEW OF LITERATURE	9
	A. Global Scenario of Diarrheal Illness	9
	B. Need for Green Synthesis of Silver Nanoparticles	11
	C. Role of Selected Medicinal Plants in Green Synthesis	13
	D. Historical and Recent Applications of Silver Nanoparticles	18
	E. Silver Nanoparticles as a Panacea for Diarrheal Illness	20
	F. Antimicrobial Activity of Nanocoated and Edible Film of Silver onto Food Packages	21
3	METHODOLOGY	32
	Phase I : Synthesis, Characterization & Antimicrobial Study of Silver Nanoparticles	36
	A. Synthesis and Optimization of Silver Nanoparticles	36
	1. Selection of Medicinal Plants From Pilot Study	36
	2. Collection and Authentication of Medicinal Plants from Botanical Survey of India (BSI)	37
	3. Home Gardening of Medicinal Plants	38
	4. Preparation of Medicinal Plant Powder	38
	5. Optimization of Silver Nanoparticles (AgNPs) from <i>Leucas aspera</i>	39
	a. Effect of processing method on nanoparticle suspension	
	i. GLC	41
	ii. Ultra centrifugation	46
	6. Determination of Particle size and Zeta Potential from Medicinal Plants	49

CHAPTER No.	TITLE	PAGE No
	7. Determination of Antioxidant Activity of Synthesized Silver Nanoparticles	49
	8. Antimicrobial Study	50
	a. Enumeration of Bacterial Counts	50
	b. Assessment of Antimicrobial Activity	50
	B. Characterization of <i>Glycyrrhiza glabra</i> Silver Nanoparticles	51
	1. Identification of <i>Glycyrrhiza glabra</i> Constituents using Gas Chromatography (GC)	51
	2. Identification of compounds (by thin layer chromatography)	51
	3. Determination of Functional Groups by Fourier Transform Infra-Red Spectroscopy (FTIR)	51
	4. Elemental Analysis using Energy Dispersive Auger X ray analysis (EDX)	52
	5. Morphological Studies of Synthesized <i>Glycyrrhiza glabra</i> Silver Nanoaparticles using Scanning Electron Microscopy (SEM)	52
	6. Determination of Structural and Crystallinity Studies by Transmission Electron Microscopy (TEM)	52
	7. Determination of Anticancerous Property by MTT assay and Gel Electrophoresis	53
	Phase II : Coating of Silver Nanoparticles onto the Commercially Available Food Packages against <i>Enteropathogenic species</i>	54
	C. Assessment of Antimicrobial and Shelf-life Study of Nanocoated Food Packages	54
	Phase III : Synthesis, Optimization and Characterization of Nanogranular Edible Films	54
	D Synthesis and Optimization of Nanoparticles (<i>Glycyrrhiza glabra</i>) Edible Films	66
	E. Characterization of Edible Films	66
	1. Thermal Analysis by Differential Scanning	66
	2. Thermo Gravimetric Analysis	66

CHAPTER No.	TITLE	PAGE No
	3. X-Ray Diffraction	67
	4. Water Vapor Permeability (WVP)	67
	5. Antibacterial Testing of Edible Films with Inoculated Bacterial Culture	68
4	RESULTS AND DISCUSSION	69
	A.Phase I : Synthesis, Characterization and Antimicrobial Property of Silver Nanoparticles	70
	1. Authentication of Medicinal Plants from Botanical Survey of India (BSI)	70
	2. Comparison of Conductivity of Selected Medicinal Plants	70
	3. Antioxidant and Antimicrobial Quality of Phytochemical Constituents	72
	a. Antioxidant Activity	72
	b. Antimicrobial Activity of Silver Nanoparticles in the presence of Plant Extracts	74
	(i) Zone of Inhibition	79
	(ii) Microbial Plate Count	82
	4. Characterization of Plant Extracts with Silver Nanoparticles	83
	a. Chemical Constituents of <i>Glycyrrhiza glabra</i> using Gas Chromatography/ Mass Spectrometry (GC/MS)	83
	b. Chemical Constituents by Thin layer chromatography (TLC) (MACHEREY – NAGEL, GERMANY)	86
	c. Functional Groups by Fourier Transform Infra-Red Spectroscopy (FTIR) (SHIMADZU, 8400 S)	86
	d. Constituent Elements from Energy Dispersive Auger X Ray analysis (EDX OXFORD INCA)	96
	e. Morphology of <i>Glycyrrhiza glabra</i> Silver Nanoparticles using Scanning Electron Microscopy (SEM)	98
	f. Structure and Crystallinity of Transmission Electron Microscopy (TEM) (HITACHI S 4700)	99
	g. Anticancerous Activity by <i>MTT and Gel Electrophoresis</i>	100

CHAPTER No.	TITLE	PAGE No
	Phase II : Coating of Silver nanoparticles (<i>Glycyrrhiza glabra</i>) onto commercially available food packages	101
	1. Antimicrobial Property and shelf-life study of nanocoated food packages	103
	a. PET (Poly Ethylene Terephthalate)	103
	i. Shelf-life of Tomato puree in nanocoated PET bottles	110
	ii. Shelf-life of lemon juice in nanocoated PET bottles	113
	b. Infant feeding bottles (PP)	117
	i. Shelf-life study of Milk and Lemon juice in nanocoated feeding bottles (PP)	121
	c. Zip lock covers (PE)	125
	i. Shelf-life study of tomato puree in nanocoated Zip lock covers	129
	Phase III : Synthesis, Standardization & Characterization of Nanogranular Edible Films	136
	1. Synthesis and Standardization of Silver nanoparticles (<i>Glycyrrhiza glabra</i>) Edible films	137
	2. Characterization of Edible Films	138
	i. Film Thickness	138
	ii. Water Vapor Permeability	140
	iii. Thermal analysis by Differential Scanning Calorimetry (DSC)	142
	iv. Thermo Gravimetric Analysis (TGA)	147
	v. X-Ray Diffraction (XRD)	149
	vi. Antimicrobial efficiency of Edible films against <i>Enteropathogenic species</i>	151
5	SUMMARY AND CONCLUSION	157
