

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
I	Optimization of AgNP (<i>Leucas aspera</i>) based on Particle size and Zeta potential	42
II	Particle size and zeta potential of AgNP from other medicinal plants (Ultracentrifugation for 1 hr 10 minutes)	47
III	Percentage Composition of Edible Film (30 μ l of Nanoparticle Impregnated Edible Film)	56
IV	Percentage Composition of Edible Film (60 μ l of Nanoparticle Impregnated Edible Film)	57
V	Percentage Composition of Edible Film (90 μ l of Nanoparticle Impregnated Edible Film)	58
VI	Percentage Composition of Edible Film (120 μ l of Nanoparticle Impregnated Edible Film)	59
VII	Percentage Composition of Edible Film (150 μ l of Nanoparticle Impregnated Edible Film)	60
VIII	Percentage Composition of Edible Film (0.01 % Ag Impregnated Edible Film)	61
IX	Percentage Composition of Edible Film (0.05% Ag Impregnated Edible Film)	62
X	Percentage Composition of Edible Film (0.1% Ag Impregnated Edible Film)	63
XI	Percentage Composition of Edible Film (0.12% Ag Impregnated Edible Film)	64
XII	Changes in Conductivity of <i>Leucas aspera</i> Extract	71
XIII	Comparison of Conductivity of selected Medicinal plants	71
XIV	Antioxidant Activity of Medicinal Plants	72
XV	Antimicrobial Activity of AgNP from four Medicinal Plants	75

TABLE NO.	TITLE	PAGE NO.
XVI	Different Concentration of <i>Glycyrrhiza glabra</i> AgNP against Enteropathogenic species	80
XVII	Enumeration of Bacterial Counts of AgNP (<i>Glycyrrhiza glabra</i>) against Enteropathogenic species	82
XVIII	GC/MS of <i>Glycyrrhiza glabra</i>	84
XIX	FTIR Peak of the Control (without AgNP) and treated (with AgNP) of medicinal plants	88
XX	EDX of <i>Glycyrrhiza glabra</i>	96
XXI	ANOVA of Antimicrobial activity of <i>Glycyrrhiza glabra</i> AgNP with PET material against <i>E.coli</i> (MTCC 40), <i>S.enterica</i> (MTCC 3219) and <i>Sh.dysenteriae</i> (PSGIMS & R)	104
XXII	Shelf Life Study of PET bottles with Tomato puree against <i>E.coli</i> (MTCC 40), <i>S.enterica</i> (MTCC 3219) and <i>Sh.dysenteriae</i> (PSGIMS & R)	112
XXIII	Microbial Growth in <i>E.coli</i> (MTCC 40), <i>S.enterica</i> (MTCC 3219) and <i>Sh.dysenteriae</i> (PSGIMS & R) of PET bottles with Lemon juice	116
XXIV	Antimicrobial Activity of <i>Glycyrrhiza glabra</i> AgNP with PP material (Infant Feeding bottles) against <i>E.coli</i> (MTCC 40), <i>S.enterica</i> (MTCC 3219) and <i>Sh.dysenteriae</i> (PSGIMS & R)	120
XXV	Shelf Life Study of Infant Feeding bottles with Milk and Lemon juice against <i>Sh.dysenteriae</i> (PSGIMS &R)	123
XXVI	Antimicrobial Study of <i>Glycyrrhiza glabra</i> AgNP with Zip loc material (PE) against <i>E.coli</i> (MTCC 40), <i>S.enterica</i> (MTCC 3219) and <i>Sh.dysenteriae</i> (PSGIMS & R)	126
XXVII	Shelf Life Study of Zip Loc covers with Tomato puree <i>Glycyrrhiza glabra</i> AgNP with PE material against <i>E.coli</i> (MTCC 40), <i>S.enterica</i> (MTCC 3219) and <i>Sh.dysenteriae</i> (PSGIMS & R)	129
XXVIII	Thickness of Edible Film	138
XXIX	Water Vapour Permeability of Edible Films	141
XXX	Thermal Data from DSC (Differential Scanning Calorimetry)	143

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	Experimental design of the Study	34
2	<i>Andrographis paniculata</i>	36
3	<i>Curcuma longa</i>	36
4	<i>Leucas aspera</i>	36
5	<i>Glycyrrhiza glabra</i>	36
6	Anaikatti Hills, Coimbatore District, Tamil Nadu	37
7	Potted Medicinal Plants	38
8	Organic Manure	38
9	Shade Drying of Medicinal Plants	39
10	Colour Change by Bio-reduction of Medicinal Plants	41
11	A and B – Particle size and zeta potential of GLC (<i>Leucas aspera</i>) – 10 minutes	44
12	A and B – Particle size and zeta potential of GLC (<i>Leucas aspera</i>) – 20 minutes	44
13	A and B – Particle size and zeta potential of GLC (<i>Leucas aspera</i>) – 30 minutes	45
14	A and B – Particle size and zeta potential of GLC (<i>Leucas aspera</i>) – 60 minutes	45
15	A and B – Particle size and zeta potential of Ultracentrifuge (<i>Leucas aspera</i>) – 15 minutes	46
16	A and B – Particle size and zeta potential of Ultracentrifuge (<i>Leucas aspera</i>) – 45 minutes	46
17	A and B – Particle size and zeta potential of Ultracentrifuge (<i>Leucas aspera</i>) – 1 hour 10 minutes	48
18	A and B – Particle size and zeta potential of Ultracentrifuge (<i>Andrographis paniculata</i>) – 1 hour 10 minutes	48

FIGURE NO.	TITLE	PAGE NO.
19	A and B – Particle size and zeta potential of Ultracentrifuge (<i>Curcuma longa</i>) – 1 hour 10 minutes	49
20	A and B – Particle size and zeta potential of Ultracentrifuge (<i>Glycyrrhiza glabra</i>) – 1 hour 10 minutes	54
21	Teflon Casting Plates	55
22	Tapioca Starch and Plant extracts	55
23	Tapioca Starch, Plant extracts and Acetic acid	55
24	30 µl of AgNP Impregnated Edible Films	56
25	60 µl of AgNP Impregnated Edible Films	57
26	90 µl of AgNP Impregnated Edible Films	58
27	120 µl of AgNP Impregnated Edible Films	59
28	150 µl of AgNP Impregnated Edible Films	60
29	0.01% AgNP Impregnated Edible Film	61
30	0.05% AgNP Impregnated Edible Film	62
31	0.1% AgNP Impregnated Edible Film	63
32	0.12% AgNP Impregnated Edible Film	64
33	I Set of Replicates – After drying the film	65
34	II Set of Replicates - After drying the film	66
35	Antioxidant Activity of Medicinal Plants	72
36	Antibacterial Activity of <i>Leucas Aspera</i> AgNP	76
37	Antibacterial Activity of <i>Andrographis paniculata</i> AgNP	76
38	Antibacterial Activity of <i>Curcuma longa</i> AgNP	77
39	Antibacterial Activity of <i>Glycyrrhiza glabra</i> AgNP	77
40	GC/MS of <i>Glycyrrhiza glabra</i>	84

FIGURE NO.	TITLE	PAGE NO.
41	Thin Layer Chromatography of <i>Glycyrrhiza glabra</i>	86
42	FTIR of <i>Andrographis paniculata</i> (Without and With AgNP)	89
43	FTIR of <i>Leucas aspera</i> (Without and With AgNP)	90
44	FTIR of <i>Glycyrrhiza glabra</i> (Without and With AgNP)	91
45	FTIR of <i>Curcuma longa</i> (Without and With AgNP)	92
46	EDX of <i>Glycyrrhiza glabra</i>	97
47	SEM of <i>Glycyrrhiza glabra</i>	98
48	TEM of <i>Glycyrrhiza glabra</i>	99
49	MTT of Silver Nanoparticles (<i>Glycyrrhiza glabra</i>) against Hela and Liver Carcinoma Cell Lines	100
50	Gel Electrophoresis against hela and liver carcinoma cell lines	101
51	Antimicrobial Activity of <i>Glycyrrhiza glabra</i> Nanoparticles with PET materials	106 & 107
52	Shelf Life Study of Nanocoated PET Bottles with Tomato Puree	111
53	Total Viable Counts of PET Material with <i>Glycyrrhiza Glabra</i> AgNP against Enteropathogenic Species	115
54	Shelf Life of Nanocoated PET Bottles with Lemon Juice	115
55	Total Viable Counts of Infant Feeding bottles (PP) Material with <i>Glycyrrhiza glabra</i> AgNP against Enteropathogenic Species	119
56	Shelf Life of Nanocoated Infant Feeding Bottles (PP) with Milk and Lemon Juice	122
57	Total Viable Counts of Zip Loc material with <i>Glycyrrhiza glabra</i> AgNP against Enteropathogenic species	128
58	Shelf Life of Nanocoated Zip Loc Covers With Tomato Puree	131
59	Edible Films of 0.01, 0.05 and 0.1% <i>Glycyrrhiza Glabra</i> AgNP	138
60	Moisture Content of Tapioca Starch Film with 0.01, 0.05 and 0.1 % Ag	139

FIGURE NO.	TITLE	PAGE NO.
61	Water Vapour Permeability of Ag Impregnated Edible Films	140
62	Differential Scanning Calorimetry of 0.01 % AgNP (<i>Glycyrrhiza glabra</i>)	143
63	Differential Scanning Calorimetry of 0.05 % AgNP (<i>Glycyrrhiza glabra</i>)	144
64	Differential Scanning Calorimetric analysis of 0.1 % AgNP (<i>Glycyrrhiza glabra</i>)	145
65	Differential Scanning Calorimetric analysis of Control (Tapioca Starch)	146
66	Thermo Gravimetric Analysis of Silver Nanoparticles (<i>Glycyrrhiza glabra</i>)	148
67	X Ray Diffractogram pattern of Edible Films (<i>Glycyrrhiza glabra</i>)	150
68	<i>E.coli</i> growth Curve using Silver nanoparticle edible films	151
69	<i>S.enterica</i> growth curve using Silver nanoparticle Edible films	151
70	<i>S.dysenteriae</i> growth curve using Silver nanoparticle Edible Films	152

LIST OF APPENDICES

APPENDIX NO.	TITLE	PAGE NO.
1	BSI certificate of <i>Andrographis paniculata</i>	189
2	BSI certificate of <i>Leucas aspera</i>	190
3	BSI certificate of <i>Curcuma longa</i>	191
4	BSI certificate of <i>Glycyrrhiza glabra</i>	192
