CHAPTER NO.	TITLE	PAGE NO.
	Certificate	i
	Declaration	ii
	Acknowledgement	lii
	Table of Contents	v
	List of Tables	xii
	List of Figures	xv
	List of Graphs	xvi
	List of Plates	xviii
	List of Abbreviations	ix
	Abstract	xx
1	INTRODUCTION	1
	Hypothesis of the study	8
	Rationale of the study	9
	Significance of the study	9
	Objectives of the study	9
2	REVIEW OF LITERATURE	11
	2.1 Concepts of health and healthy populations	12
	2.1.1 Current scenario of global health	13
	2.1.2 Causes of global mortality	17
	2.2 Current definitions and prevalence of overnutrition	19
	2.2.1 Defining overnutrition, overweight and obesity	19
	2.2.2 Prevalence of overnutrition in the World, Nation and State	20
	2.3 Aetiology of overnutrition	22

CHAPTER NO.	TITLE	PAGE NO.
2.3.1	Genetic causes of obesity	24
2.3.2	Environmental causes of obesity	25
2.3.3	Gene-Environment Interactions as causes of obesity	26
2.4	Indicators of overnutrition	27
2.5	Health complications of overnutrition	29
2.6	Current methods to assess overnutrition	34
2.7	Current methods to manage overweight and obesity	35
2.7.1	Clinical treatment methods	36
2.7.2	Lifestyle management methods	37
2.7.3	Surgery methods	38
2.8	Research gap in existing literature	39
3	METHODOLOGY	40
	Phase I	
3.1	Selection of subjects and preparation of research tools	42
3.1.1	Selection of locale	42
3.1.2	Calculation of sample size	44
3.1.3	Developing, pilot-testing and validating research tools	47
3.1.4	Obtaining permissions for utilising pre-validated tools for study	47
3.1.5	Obtaining institutional human ethics committee approval and disruption of study due to Covid-19	48
	Phase II	
3.2	Collection of background information and socio-economic profiling of subjects	48

CHAPTER NO.	TITLE	PAGE NO.
Phase III		
3.3	Assessment of nutritional status and lifestyle pattern of subjects	49
3.3.1	Assessment of nutritional status of subjects	49
3.3.1.1	Anthropometric assessment of study subjects	49
3.3.1.2	Assessment of biochemical parameters of study subjects	55
3.3.1.3	Clinical examinations and assessment of morbidity pattern of study subjects	56
3.3.1.4	Assessing dietary pattern, food and nutrient intake of study subjects	58
3.3.2	Assessment of lifestyle pattern of study subjects	59
3.3.2.1	Assessing physical activity pattern of study subjects	59
3.3.2.2	Assessing sleep quality of study subjects	60
3.3.2.3	Understanding KAP of study subjects relating to obesity management	61
Phase IV		
3.4	Identification and validation of study intervention methods	62
3.4.1	Preparing nutrition education modules	62
3.4.2	Identifying exercise routines according to physical activity pattern	64
3.4.3	Creating balanced diet plans according to body weight	66
3.4.4	Preparation of health posters and calendar	67
3.4.5	Validation of intervention methods	69

CHAPTER NO.	TITLE	PAGE NO.
	Phase V	
3.5	Implementing interventions of lifestyle modifications for study subjects	69
3.5.1	Improving physical activity levels through exercise routines	70
3.5.2	Imparting nutrition education and nutrition counselling	70
	Phase VI	
3.6	Assessing impact of intervention on subjects	70
3.6.1	Impact on nutritional status of subjects	71
3.6.1.1	Anthropometric parameters	71
3.6.1.2	Biochemical parameters of subjects	71
3.6.1.3	Clinical parameters of subjects	71
3.6.1.4	Dietary pattern, food and nutrient intake of subjects	71
3.6.2	Impact on lifestyle pattern of subjects	71
3.6.2.1	Physical activity pattern of subjects	71
3.6.2.2	Sleep quality of subjects	72
3.6.2.3	Knowledge, attitudes and practices of subjects	72
3.7	Statistical analysis and interpretation	72
3.8	Validation of study data	73
3.9	Conceptual framework of study	74
4	RESULTS AND DISCUSSION	77
	Phase I	
4.1	Validation of KAP questionnaire and pilot testing	79

CHAPTER NO.	TITLE	PAGE NO.
Phase II		
4.2	Background information and socio-economic profiling of subjects	81
4.2.1	Background information of subjects	81
4.2.2	Socio-economic profiling of subjects	85
Phase III		
4.3	Nutritional status and lifestyle pattern of subjects	88
4.3.1	Nutritional status of subjects	88
4.3.1.1	Anthropometric assessment of subjects	88
4.3.1.2	Biochemical assessment of subjects	91
4.3.1.3	Clinical examination of subjects	92
4.3.1.4	Dietary pattern, food and nutrient intake of subjects	97
4.3.2	Lifestyle pattern of subjects	107
4.3.2.1	Physical activity pattern of subjects	108
4.3.2.2	Sleep quality of subjects	110
4.3.2.3	Knowledge, Attitudes and Practices (KAP) of subjects	112
Phase IV		
4.4	Validating intervention methods	113
4.4.1	Validating exercise routines	113
4.4.2	Validating nutrition education modules	116
4.4.3	Validating sample diet plans	117
Phase V		
4.5	Assessing impact of interventions on subjects	117

CHAPTER NO.	TITLE	PAGE NO.
4.5.1	Impact of intervention on nutritional status of subjects	117
4.5.1.1	Anthropometric parameters of subjects	117
4.5.1.2	Biochemical parameters of subjects	126
4.5.1.3	Clinical parameters of subjects	130
4.5.1.4	Dietary pattern, food and nutrient intake of subjects	135
4.5.2	Impact of intervention on lifestyle pattern	144
4.5.2.1	Physical activity pattern of subjects	144
4.5.2.2	Sleep quality of subjects	147
4.5.2.3	Knowledge, attitudes and practices of subjects	148
Phase VI		
4.6	Assessing effectiveness of intervention on subjects	150
4.6.1	Effect of intervention on anthropometric factors of study subjects	151
4.6.2	Effect of intervention on biochemical parameters of study subjects	155
4.6.3	Effectiveness of intervention on diet and sleep pattern of study subjects	158
5	SUMMARY AND CONCLUSION	161
	Introduction	161
	Definition of the Problem Statement	161
	Rationale	162
	Objectives	162
	Methodology	163
	Salient Findings	165
	Conclusion	176

CHAPTER NO.	TITLE	PAGE NO.
	Limitations	176
	Recommendations for future research	177
	BIBLIOGRAPHY	178
	ANNEXURES	224
	PUBLICATIONS	
	PLAGIARISM REPORT
