

## LIST OF TABLES

TABLE No.	TITLE	PAGE No.
1	Identified positive verbal expressive dimensions describing ecotourism experience	24
2	Identified negative verbal expressive dimensions describing ecotourism experience	25
3	Number of domestic and foreign tourists visitng Periyar Tiger reserve on an average in peak and lean season between 2014 - 15	42
4	Number of sample respondents selected in peak and lean season	43
5	Constructs and indicators of ecotourism experience	53
6	List of major reference used for developing the construct – ecotourism experience	54
7	Indicators of the construct – Ecotourist satisfaction	54
8	List of major reference used for developing the constructs – Ecotourist satisfaction	55
9	Indicators of the construct – Future behavioral intention	55
10	List of major reference used for developing the construct – Future behavioral intention	56
11	Goodness of fit indices for the measurement model	62
12	Details of final constructs and indicatives used in the study	63
13	Validity / Reliability guide lines in Warp PLS 2.0	64
14	Socio – economic profile of the selected respondents	67
15	Motivational factors for visiting Periyar Tiger Reserve	75
16	Sources of information for the respondents about Periyar Tiger Reserve.	77
17	Number of sample respondents visiting Periyar Tiger Reserve in Peak and Lean season	79
18	Results of Analysis of variance to find the differences in components of ecotourism experience in peak and lean season	81
19	Factor loadings and communalities of ecotourism experience construct	83

<b>TABLE No.</b>	<b>TITLE</b>	<b>PAGE No.</b>
20	KMO and Bartlett's test of sphericity	84
21	Factors, Indicatives of each factor and cumulative percent of variance	85
22	Reliability estimate of the rotated factors	85
23	Goodness of fit indices of the measurement model - tangible attributes	88
24	Goodness of fit indices of the measurement model - intangible attributes	90
25	Goodness of fit indices of the measurement model – psychological attributes	92
26	Goodness of fit indices of the measurement model – demographic attributes	94
27	Standard and residual covariances among tangible attributes	97
28	Standard and residual covariances among intangible attributes	97
29	Standard and residual covariances among psychological attributes	98
30	Standard and residual covariances among demographical attributes	98
31	Goodness of fit indices of confirmatory model for ecotourism experience construct	99
32	List of variables included in the construct of ecotourism experience after confirmative factor analysis	100
33	Standard regression coefficients, critical ratio and factor loading of tangible, intangible, psychological and demographic attributes	102
34	Critical ratio, p Values and squared multiple correlations of all indicators	104
35	Composite reliability and variance extracted for each minor construct	105
36	Squared Correlations among constructs	105
37	Covariance among constructs	106

<b>TABLE No.</b>	<b>TITLE</b>	<b>PAGE No.</b>
38	Goodness of fit indices of the measurement model for ecotourist satisfaction	108
39	Goodness of fit indices of the measurement model for future behavioral intention	110
40	Mode fit indices and p values of ecotourism experience construct	112
41	Composite reliability and Cronbach's after WarpPLS	112
42	Factor loadings and P Values for ecotourism experience	113
43	Indicator weights and VIF of Ecotourism experience construct	114
44	Latent variable correlations and average variance extracted	115
45	Model fit indices and p values of the integrated model	117
46	Factor loadings and p values for ecotourist satisfaction constructs	118
47	Factor loadings and P Values for future behavioral intention construct	119
48	Latent variable correlation of constructs	119
49	Estimated relationship between ecotourism experience, ecotourist satisfaction and future behavioral intention	120
50	Mean scores of the constraints faced and Garret ranking for the constraints faced in the peak and lean season	122
51	Suggestions given by the respondents to improve ecotourism at Periyar Tiger Reserve	123

## LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	Location of Periyar Tiger Reserve	38
2	Construct mapping used in this study	52
3A	Age composition of domestic tourists (In percent)	69
3B	Age composition of foreign tourists ( In percent)	69
3C	Age composition of total tourists ( In percent)	69
4A	Educational composition of domestic tourists (in percent)	71
4B	Educational composition of foreign tourists (in percent)	71
4C	Educational composition of total tourists (in percent)	71
5A	Income composition of domestic tourists (in percent)	73
5B	Income composition of foreign tourists (in percent)	73
5C	Income composition of total tourists (in percent)	73
6A	Motivations for visiting Periyar Tiger Reserve-Domestic tourists (in percent)	76
6B	Motivations for visiting Periyar Tiger Reserve-Foreign tourists (in percent)	76
6C	Motivations for visiting Periyar Tiger Reserve-Total tourists (in percent)	76
7A	Sources of information about Periyar Tiger Reserve for domestic tourists (in percent)	78
7B	Sources of information about Periyar Tiger Reserve for foreign tourists (in percent)	78
7C	Sources of information about Periyar Tiger Reserve for total tourists (in percent)	78

<b>FIGURE NO.</b>	<b>TITLE</b>	<b>PAGE NO.</b>
8	Measurement model for tangible attributes	87
9	Measurement model for intangible attributes	89
10	Measurement model for psychological attributes	91
11	Measurement model for demographic attributes	93
12	Respecified confirmatory model for ecotourism experience construct	96
13	Measurement model for ecotourist satisfaction	107
14	Measurement model for future behavioral intention	109
15	Identified dimensions of ecotourism experiences	111
16	Integrated model to find out the relationship between ecotourism experience, ecotourist satisfaction and future behavioral intention.	116

## LIST OF APPENDIX

<b>APPENDIX NO.</b>	<b>TITLE</b>	<b>PAGE NO.</b>
1	An interview schedule to elicit information on ecotourism experience, ecotourism satisfaction and future behavioural intention	157
