CHAPTER NO.	TITLE	PAGE NO.
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF EXHIBITS	
	LIST OF APPENDICES	
I	INTRODUCTION	1
II	REVIEW OF LITERATURE	7
	A. Phenomenon of Carbon Footprint	7
	B. Environmental Impact of Construction Projects	10
	C. Concepts of Obsolescence, Adaptive Reuse and Refurbishment	11
	D. Green Technology and Sustainability	24
	E. Rating Systems for New and Existing Buildings in India	27
III	METHODOLOGY	30
	Phase I - A. Situation Analysis – Identify Expertise in Refurbishment	30
	B. Field Survey – Locate Excerpts in Adaptive Reuse	32
	Phase II - A. Vignettes on Success Stories	35
IV	RESULTS AND DISCUSSION	37
	A. Architect’s / Interior Designer’s Portfolio	37
	B. Scenario of Refurbished Buildings for Adaptive Reuse	53
	C. Outcomes of the Case Study	84
V	SUMMARY AND CONCLUSION	105
	REFERENCES	
	APPENDICES	

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
1	Advantages and Disadvantages of Adaptive Reuse	16
2	Year of Establishment of the Firms	38
3	Profile of the Buildings housing Architecture and Interior Design Firms	38
4	Initial Investment Incurred	39
5	Annual Turnover of the Firms	39
6	CAD softwares used for designing	40
7	Number of Refurbishment Projects Completed	41
8	Nature of Refurbishments sought	42
9	Reasons for Refurbishments sought after by Clients	43
10	Sequence followed in Assessing Conditions of Existing Buildings	44
11	Change of Systems during Refurbishment	45
12	Difficulties Faced during Project Execution	45
13	Procedural Aspects Considered	47
14	Criteria for Selecting Materials for Projects	49
15	Eco friendly methods or techniques used	50
16	Incorporation of Green Technology	51
17	Constraints to adopt Eco Friendly Techniques	51
18	Procurement of Clientele	52
19	Nature and scale of occupancy	53
20	Purpose of refurbishment	56
21	Motivation to refurbish over new construction	58
22	Choice of buildings for adaptive reuse	59
23	Age of building Vs Year of adaptive reuse	60
24	Reasons identified for refurbishment	61

TABLE NO.	TITLE	PAGE NO.
25	Time taken for conversion	62
26	Personnel responsible for execution of the projects	63
27	Reasons for choosing specific professionals	64
28	Design compatibility to preferred specifications	65
29	Level of refurbishment affording adaptive reuse	66
30	Refurbishment of sub and super-structure	67
31	Refurbishment of fenestrations	68
32	Refurbishment of service components	69
33	Refurbishment of aesthetic components	70
34	Refurbishment for extension and conversion	71
35	Factors which warranted refurbishment	72
36	Cost of refurbishment based on built up area	73
37	Type of Ownership Vs Expenditure on refurbishment	74
38	Purpose redefined Vs Cost of refurbishment	75
39	Nature of refurbishment preferred Vs Cost of refurbishment	76
40	Energy and/or water conservation devices incorporated	77
41	Eco friendly aspects incorporated	77
42	Intelligent systems installed	80
43	Problems faced during the execution of the project	82
44	Hassles faced after occupation	83
45	Disadvantages of reusing existing buildings	83
46	Rationale for Refurbishment	101
47	Capitalizing on obsolescence leading to conversion and adaptability	102
48	Components reused and eco friendly components introduced	103

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	The Carbon Footprint	7
2	Options for Adaptive Reuse	15
3	Stages in Planning Refurbishment Work	21
4	Principles of Sustainable Design	26
5	Year of Establishment	38
6	Initial Investment	39
7	Nature of Refurbishments sought	42
8	Reasons for Refurbishments	43
9	Criteria for Change of Systems	45
10	Problems Faced during Project Execution	46
11	Charging criterion	47
12	Consideration of Vastu and Fengshui concepts	47
13	Client's view on plans	47
14	Clients views on expenses	47
15	Source of materials	47
16	Eco friendly methods or techniques used	50
17	Built up area in sq.ft.	54
18	Reasons for choosing particular Professionals	64
19	Expenditure incurred for Refurbishment	74

LIST OF EXHIBITS

EXHIBIT NO.	TITLE	PAGE NO.
1	Sources of Greenhouse gases	9
2	Types of Obsolescence	13
3	Primary Rating systems in India	28
4	Methodology – Flow Chart	36
5	Conversion Prospects Identified	57
6	Eco friendly aspects incorporated	78
7	Intelligent Systems Installed	81
8	Building ‘A’ – SMS Hotel	87
9	Building ‘B’ – Tangerine	90
10	Building ‘D’ - Eye Trust Hospital	95
11	Building ‘D’ - Eye Trust Hospital	96

LIST OF APPENDICES

APPENDIX NO.	TITLE
I	Interview schedule to elicit information from Architects/ Interior Designers regarding Refurbishment process and Eco friendly techniques used in the process
II	Interview schedule to elicit information on Buildings Adapted for Reuse
III	Interview guide to elicit information the details of the refurbishment process of reused buildings
IV	Checklist for eco friendly practices
