Coimbatore – 641 043.

In Partial Fulfilment of the Requirements for the Degree of
Doctor of Philosophy in Food Science and Nutrition

February 2023

80_Recommendations

- Children with ADHD who were enrolled in special education programs and regular schools may be compared.
- A cross-cultural study on children with ADHD can be carried out.
- As the study demonstrates a strong influence of digital health intervention , this may be recommended as one of the intervention strategies for studies on Special children.
