CHAPTER NO.	LIST OF CONTENTS	PAGE NO.
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF PLATES	
	LIST OF APPENDICES	
I.	INTRODUCTION	1
II.	REVIEW OF LITERATURE	8
	A. Diabetes - the global threatener	8
	B. Hyperlipidemia – the health cracker	16
	C. Tuberculosis – the human waster	22
	D. Significance of wheat germ, bran and grass	28
III.	METHODOLOGY	36
	A. Selection of locales and subjects	36
	B. Eliciting background information of the Subjects	38
	C. Assessment of anthropometric measurements and conduct of diet survey	38
	D. Supplementation of wheat germ, bran and grass to diabetic, hyperlipidemic and tuberculosis subjects	41
	E. Evaluation of the impact of supplementation	48
IV.	RESULTS AND DISCUSSION	55
	A. Nutrient content of wheat germ , bran and grass	55
	B. Background details of the subjects	58
	C. Anthropometric measurements of the subjects	65

	D. Food pattern and dietary practices of the subjects	67
	E. Impact evaluation of individual and combined supplementation of wheat germ, bran and grass on diabetic, hyperlipidemic and tuberculosis subjects	73
V	SUMMARY AND CONCLUSION	158
	BIBLIOGRAPHY	
	APPENDICES	

LIST OF TABLES

TABLE No.	TITLE	PAGE No.
I	Phytosterol content of wheat germ	45
II	Details of the dosage of wheat germ, bran and grass supplemented to the experimental groups	47
III	Parameters for biochemical assessment	54
IV	Nutrient content (per 100g) of wheat germ, bran and grass	56
V	Background details of the subjects	59
VI	Mean anthropometric measurements of diabetic, hyperlipidemic and tuberculosis subjects	66
VII	Food intake pattern of diabetic subjects	68
VIII	Nutrient intake of diabetic subjects	69
IX	Food intake pattern of hyperlipidemic subjects	70
X	Nutrient intake of hyperlipidemic subjects	71
XI	Food intake pattern of tuberculosis subjects	72
XII	Nutrient intake of tuberculosis subjects	73
XIII	Changes in physiological symptoms of diabetic subjects	74

TABLE No.	TITLE	PAGE No.
XIV	Changes in mean serum fasting, postprandial glucose and glycosylated hemoglobin levels	76
XV	Changes in mean superoxide dismutase, malondialdehyde, glutathione reduced and glutathione peroxidase levels	84
XVI	Changes in mean serum vitamin C and vitamin E levels	93
XVII	Changes in mean serum zinc, selenium and copper levels	99
XVIII	Comparison of effect of different supplements on blood parameters	105
XIX	Changes in blood parameters after the withdrawal of supplementation	106
XX	Changes in mean serum total cholesterol, triglyceride, LDL-cholesterol, HDL-cholesterol and VLDL-cholesterol levels	109
XXI	Changes in mean serum Apoenzyme A ₁ and B levels	121
XXII	Changes in mean lipoprotein ratio levels	126
XXIII	Comparison of effect of different supplements on blood parameters	127
XIV	Changes in blood parameters after the withdrawal of supplementation	129
XXV	Changes in physiological symptoms of tuberculosis subjects	131
XXVI	Changes in mean serum total protein and albumin levels	132
XXVII	Changes in serum TLC and CD ₄ levels	135
XXVIII	Changes in mean superoxide dismutase, malondialdehyde, glutathione reduced, glutathione peroxidase and total antioxidant status levels	141
XXIX	Changes in mean serum zinc, selenium and copper levels	150

TABLE No.	TITLE	PAGE No.
XXX	Comparison of effect of different supplements on blood parameters	155
XXXI	Changes in blood parameters after the withdrawal of supplementation	156

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1.	Grouping of subjects	43
2.	Research design	49
3.	Age wise distribution of the subjects	60
4.	Type of distribution of the families	61
5.	Educational status of the subjects	62
6.	Occupational status of the subjects	63
7.	Income status of the subjects	64
8.	Percentage adequacy of the food intake pattern of the diabetic subjects	68
9.	Percentage adequacy of the food intake pattern of the hyperlipidemic subjects	70
10.	Percentage adequacy of the food intake pattern of the tuberculosis subjects	72
11.	Changes in serum fasting blood glucose levels	78
12.	Changes in serum postprandial blood glucose levels	80
13.	Changes in serum glycosylated hemoglobin levels	82
14.	Changes in serum superoxide dismutase levels	87

FIGURE NO.	TITLE	PAGE NO.
15.	Changes in serum malondialdehyde levels	89
16.	Changes in serum glutathione reduced levels	90
17.	Changes in serum glutathione peroxidase levels	92
18.	Changes in serum vitamin C levels	96
19.	Changes in serum vitamin E levels	97
20.	Changes in serum zinc levels	101
21.	Changes in serum selenium levels	103
22.	Changes in serum copper levels	104
23.	Changes in serum total cholesterol levels	112
24.	Changes in serum triglyceride levels	114
25.	Changes in serum HDL-cholesterol levels	116
26.	Changes in serum LDL-cholesterol levels	118
27.	Changes in serum VLDL-cholesterol levels	120
28.	Changes in serum serum apoenzyme A ₁ levels	123
29.	Changes in serum serum apoenzyme B levels	124
30.	Changes in serum total protein levels	133
31.	Changes in serum albumin levels	135
32.	Changes in serum TLC levels	138
33.	Changes in serum CD ₄ levels	140
34.	Changes in serum superoxide dismutase levels	144

FIGURE NO.	TITLE	PAGE NO.
35.	Changes in serum malondialdehyde levels	145
36.	Changes in serum glutathione reduced levels	146
37.	Changes in serum glutathione peroxidase levels	148
38.	Changes in serum total antioxidant activity levels	149
39.	Changes in serum zinc levels	152
40.	Changes in serum selenium levels	153
41.	Changes in serum copper levels	154

LIST OF PLATES

PLATE NO.	TITLE	PAGE NO.
1.	Procurement of wheat germ and preparation for distribution	43a
2.	Preparation of chapathi from wheat bran	43b
3.	Germination and preparation of wheat grass juice	43c

LIST OF APPENDICES

APPENDIX NO.	TITLE
1.	Interview schedule to assess socio- economic status , and dietary intake of the subjects
2.	Individual values of the initial and final biochemical investigations of the subjects
