

CONTENTS

CHAPTER NO.	TITLE	PAGE NO.
	LIST OF TABLES LIST OF FIGURES LIST OF PLATES LIST OF APPENDICES ABSTRACT PUBLICATIONS	
1	INTRODUCTION	1
2	REVIEW OF LITERATURE A. Polycystic Ovarian Syndrome – An Overview B. Polycystic Ovarian Syndrome and Oxidative Stress C. Role of Antioxidants in the Management of Polycystic Ovarian Syndrome D. Awareness on consumption of Underutilized Vegetable Greens E. Nutraceutical Potential and Antioxidant Effect of Beet Greens (<i>Beta vulgaris L</i>)	12 12 27 28 32 38
3	METHODOLOGY Phase I: Selection and Preparation of Underutilized Green Leafy Vegetable Powder A. Selection of area for plant collection B. Selection of underutilized green leafy vegetable of carrot, radish and beetroot C. Collection of underutilized green leafy vegetable of carrot, radish and beetroot D. Preparation of underutilized green leafy vegetable powder	44 47 47 48 49 50

Phase II: Determination of Total Antioxidant, Total Phenol and Total Flavonoid in the Selected Underutilized Green Leafy Vegetable Powder	51
A. Determination of Total Antioxidant in the selected underutilized green leafy vegetable powder	51
B. Determination of Total Phenol in the selected underutilized green leafy vegetable powder	52
C. Determination of Total Flavonoid in the selected underutilized green leafy vegetable powder	54
D. Justification for selection of <i>Beta vulgaris</i> L. leaf extract for further study	54
Phase III: Analysis of Phytochemical Constituents, Antioxidant Activity, Nutrients and Secondary Metabolites of <i>Beta vulgaris</i>. L. Leaf Powder	55
A. Screening for pesticide in the selected <i>Beta vulgaris</i> L. leaf powder	55
B. Screening for phytochemicals in the selected <i>Beta vulgaris</i> L. leaf extract	55
C. Determination of antioxidant activity in the selected <i>Beta vulgaris</i> L. leaf extract	57
D. Estimation of nutrients in the selected <i>Beta vulgaris</i> L. leaf powder	58
E. Estimation of flavonoids in the selected <i>Beta vulgaris</i> L. leaf extract	59
F. GCMS screening of secondary metabolites in the selected <i>Beta vulgaris</i> L. leaf extract	59
G. HPLC screening of Vitamin A and E in the selected <i>Beta vulgaris</i> L. leaf extract	60
Phase IV: Acute Toxicity study of <i>Beta vulgaris</i> L. leaf Aqueous Extract on Adult Female Rats	61
A. Acute toxicity study of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	61

	B. General observation of <i>in vivo</i> acute toxicity study of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	63
	C. Observation of Gross Behavior of <i>in vivo</i> acute toxicity study of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	63
	Phase V: <i>In-vivo</i> effects of <i>Beta vulgaris</i> L. leaf aqueous extract of Polycystic Ovarian Syndrome (PCOS) in Adult Female Rats	63
	A. <i>In vivo</i> study of the effects of <i>Beta vulgaris</i> L. leaf aqueous extract on PCOS induced adult female rats	63
	B. Monitoring the fluctuation's in the rat's estrous cycle	67
	C. Determination of the effects of <i>Beta vulgaris</i> L. leaf aqueous extract on PCOS adult female rats in association with physical parameters	67
	D. Determination of the effects of <i>Beta vulgaris</i> L. leaf aqueous extract on PCOS adult female rats in association with biochemical parameters	68
	E. Determination of the effects of <i>Beta vulgaris</i> L. leaf aqueous extract on PCOS adult female rats in association with reproductive hormones	69
	F. Determination of the effects of <i>Beta vulgaris</i> L. leaf aqueous extract on PCOS adult female rats in association with antioxidant status	69
	G. Determination of histopathology of <i>Beta vulgaris</i> L. leaf aqueous extract on PCOS adult female rats	70
	H. Consolidation and statistical analysis of the data	71
4	RESULTS AND DISCUSSION	72
	Phase I: Determination of total antioxidant, total phenol and total flavonoid in the selected underutilized green leafy vegetable powder	73
	A. Determination of total antioxidant in the selected underutilized green leafy vegetable powder	73

B. Determination of total phenol in the selected underutilized green leafy vegetable powder	75
C. Determination of total flavonoid in the selected underutilized green leafy vegetable powder	76
D. Justification for selecting <i>Beta vulgaris</i> L. leaf powder for further study	78
Phase II: Screening of phytochemicals, antioxidant activity and nutrients content of <i>Beta vulgaris</i> L. leaf extract	79
A. Pesticide screening in <i>Beta vulgaris</i> L. leaf powder	79
B. Phytochemical screening in <i>Beta vulgaris</i> L. leaf extract	80
C. Quantitative analysis of anti nutrients in <i>Beta vulgaris</i> L. leaf powder	82
D. Determination of antioxidant activity in <i>Beta vulgaris</i> L. leaf extract	83
E. Screening of nutrients in <i>Beta vulgaris</i> L. leaf powder	88
Phase III: Screening of flavonoids, secondary metabolites and fat soluble vitamin A and E of <i>Beta vulgaris</i> L. leaf extract	90
A. Screening of flavonoids in <i>Beta vulgaris</i> L. leaf extract by HPLC method	90
B. Screening of Secondary Metabolites in <i>Beta vulgaris</i> L. Leaf Extract using GCMS	92
C. Screening of fat soluble vitamin A and E in <i>Beta vulgaris</i> L. leaf extract by HPLC	95
Phase IV: Acute toxicity study of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	96
A. Acute Toxicity study of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	96
B. General observation of acute toxicity study of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	97
C. Observation of Gross Behavior of <i>Beta vulgaris</i> L. leaf aqueous extract on adult female rats	98

	Phase V: <i>In-vivo</i> effects of <i>Beta vulgaris</i> L. leaf aqueous extract on polycystic ovarian syndrome (PCOS) in adult female rats	101
	A. Evaluation of Estrous Cyclicity of Experimental Animals	101
	B. Evaluation of the Effects of <i>Beta vulgaris</i> L. Leaf Aqueous Extract on PCOS Adult Rats in Association with Physical Parameters	101
	C. Evaluation of the Effects of <i>Beta vulgaris</i> L. Leaf Aqueous Extract on PCOS Adult Rats in Association with Biochemical Parameters	107
	D. Evaluation of the effects of <i>Beta vulgaris</i> L. Leaf aqueous extract on PCOS adult rats in association with reproductive hormones	110
	E. Evaluation of the effects of <i>Beta vulgaris</i> L. Leaf aqueous extract on PCOS adult rats in association with hepatoprotective and oxidative stress	114
	F. Histopathology Results of the PCOS Control Adult Rats Ovary	121
5	SUMMARY AND CONCLUSION	124
	BIBLIOGRAPHY	133

LIST OF TABLES

TABLE NO.	TITLE	PAGE NO.
I	Grouping of Animals for Acute Toxicity Study	
II	Grouping of Animals for Supplementation Study	
III	Total Antioxidant Present in the Selected Undertutilized Green Leafy Vegetable Powder	74
IV	Total Phenols Present in the selected Underutilized Green Leafy Vegetable Powder	75
V	Total Flavonoids Present in the selected Underutilized Green Leafy Vegetable Powder	77
VI	Pesticide Screening in <i>Beta vulgaris</i> L. Leaf Powder	80
VII	Phytochemical Screening in <i>Beta vulgaris</i> L. Leaf extract	81
VIII	Quantitative Analysis of Anti-Nutrient in <i>Beta vulgaris</i> L. Leaf Powder	82
IX	Antioxidant Activity of Leaf Extract of <i>Beta vulgaris</i> L. by DPPH Assay	83
X	Antioxidant Activity of Leaf Extract of <i>Beta vulgaris</i> L. by Reducing Assay	85
XI	Antioxidant Activity of Leaf Extract of <i>Beta Vulgaris</i> L. by Hydrogen Peroxide Assay	87
XII	Nutrient Composition of <i>Beta vulgaris</i> L. Leaf Powder	88
XIII	Screening of Flavonoids in <i>Beta vulgaris</i> L. Leaf Extract	90
XIV	Screening of Secondary Metabolites in <i>Beta vulgaris</i> L. Leaf Extract	92
XV	HPLC Screening of Vitamin A and E in <i>Beta vulgaris</i> L. Leaf Extract	96
XVI	General Observation of the Acute Toxicity Study of the Animals	97
XVII	Observation of Central Nervous System Stimulant Activities	98

XVIII	Observation of Central Nervous System Depression Activities	99
XIX	Observation of Autonomous Nervous System Activities	100
XX	Mean Body Weight of PCOS Control and Treatment Groups	102
XXI	Mean Ovary Weight of PCOS Control and Treatment Groups	104
XXII	Mean Liver Weight of PCOS Control and Treatment Groups	106
XXIII	Blood Glucose Level of PCOS Control and Treatment Groups	107
XXIV	Total Cholesterol, Triglyceride, HDL-C and LDL-C Levels of PCOS control and Treatment Groups	109
XXV	Reproductive Hormone Levels of PCOS Control and Treatment Groups	111
XXVI	Lipid Peroxide Level in Liver of PCOS Control and Treatment Groups	115
XXVII	Superoxide Dismutase (SOD) and Catalase Level of PCOS Control and Treatment Groups	117
XXVIII	Glutathione Stimulating Hormone (GSH) Level of PCOS Control and Treatment Groups	120

LIST OF FIGURES

FIGURE NO.	TITLE	PAGE NO.
1	Pathophysiology of Polycystic Ovary Syndrome	
2	Research Design	46
3	Selection of Area for Plant Collection	47
4	Criteria for Selection of Underutilized Green Leafy Vegetable	48
5	Preparation of Underutilized Vegetable Greens Powder	50
6	Total Antioxidant Level of the Selected Underutilized Green Leafy Vegetable Powder	74
7	Total Phenol in the Selected Underutilized Green Leafy Vegetable Powder	76
8	Total flavonoid in the Selected Underutilized Green Leafy Vegetable Powder	77
9	Antioxidant Activity of <i>Beta vulgaris</i> L. Leaf Extract by DPPH Assay	84
10	Antioxidant Activity of <i>Beta vulgaris</i> L. Leaf Extract by Reducing Assay	86
11	Antioxidant Activity of <i>Beta vulgaris</i> L. Leaf Extract by Hydrogen Peroxide Assay	87
12	HPLC Screening for Flavonoids of <i>Beta vulgaris</i> L. Leaf Extract	91
13	GCMS Screening for Secondary Metabolites of <i>Beta vulgaris</i> L. Leaf Extract	94
14	Lutenising Hormone Level of PCOS Control and Treatment Groups	112
15	Follicle Stimulating Hormone Level of PCOS Control and Treatment Groups	112
16	Estradiol Level of PCOS Control and Treatment Groups	113
17	Lipid Peroxidation Level of PCOS Control and Treatment Groups	116
18	Superoxide Dismutase Activity of PCOS Control and Treatment Group	118
19	Catalase Level of PCOS Control and Treatment Group	118
20	Glutathione Stimulating Hormone of PCOS Control and Treatment Group	121

LIST OF PLATES

PLATE NO.	TITLE	PAGE NO.
1	Collection of Green Leafy Vegetables	49
2	Processing of Underutilized Vegetable Greens	51
3	Qualitative Estimation of Phytochemicals in <i>Beta vulgaris</i> L. Leaf Extract	56
4	Estimation of Minerals in <i>Beta vulgaris</i> L. Leaf Powder	58
5	Estimation of Vitamins in <i>Beta vulgaris</i> L. Leaf Powder	59
6	Assessment of Body Weight of the Experimental Animals	64
7	Grouping of Experimental Animals	66
8	Administration of Estradiol Valerate (intraperitoneal route) and <i>Beta vulgaris</i> L. leaf Aqueous Extract (Oral Route)	67
9	Assessment of Ovary Weight of Experimental Animals	68
10	Histopathological Examination of Ovarian Tissue	122

LIST OF APPENDICES

APPENDIX NO.	TITLE	PAGE NO.
I	<i>Beta vulgaris</i> L. Plant Taxonomic Authentication	187
II	DPPH Assay	188
III	Estimation of Total Phenols	189
IV	Estimation of Total Flavonoids	190
V	Procedure for Pesticide Analysis using GCMS	191
VI	Procedure for Phytochemical Screening	192
VII	Estimation of Hydrogen Peroxide Scavenging Capacity	194
VIII	Estimation of Reducing Power	195
IX	Procedure for Nutrients and Mineral Estimation	196
X	Estimation of Flavonoids Using HPLC	201
XI	Screening for Secondary Metabolites GCMS Interpretation	202
XII	Estimation of Vitamin A using HPLC	203
XIII	Estimation of Vitamin E using HPLC	204
XIV	Ethical Approval Letter for Animal Study	205
XV	Plagiarism Report	206
XVI	Publications	207
