CHAPTER NO.	TITLE	PAGE NO.
	LIST OF TABLES	
	LIST OF FIGURES	
	LIST OF PLATES	
	LIST OF APPENDICES	
1	INTRODUCTION	1
2	REVIEW OF LITERATURE	6
3	MATERIALS AND METHODS	35
4	RESULTS AND DISCUSSION	52
5	SUMMARY AND CONCLUSION	146
	REFERENCES	
	APPENDICES	

## LIST OF TABLES

Table No.	Title	Page No.
I	Morphological and biochemical characteristics of the selected bacterial isolates	53
II	Physical characteristics of the raw and microbially treated nickel electroplating effluent	85
III	Chemical characteristics of raw and microbially treated nickel electroplating effluent	87
IV	Biometric parameters in 7 days old green gram seedlings grown in different treatments	95
V	Growth parameters (shoot length, root length, fresh weight and dry weight) of green gram plants grown in different treatments	100
VI	Yield parameters (Number and weight of pods/plant) of green gram plants (60 <sup>th</sup> day)	105
VII	Total protein and carbohydrate contents of green gram plants grown in different treatments	108
VIII	Total chlorophyll content in the leaves of green gram grown in different treatments	111

IX	Nickel content in the green gram plants and pods	113
X	Physicochemical characters of the pretreated soil	116
XI	Physicochemical characteristics of the treated soil at the end of the experimental period	119
XII	Growth characteristics of <i>Clarias gariepinus</i> grown in different treatments	126
XIII	Total protein content in <i>Clarias gariepinus</i> exposed to different treatments	128
XIV	Total carbohydrate content in <i>Clarias gariepinus</i> exposed to different treatments	130
XV	Lipid content in <i>Clarias gariepinus</i> exposed to different treatments	132
XVI	Nickel content in <i>Clarias gariepinus</i> exposed to different treatments	134

---

## LIST OF FIGURES

Figure No.	Title	Page No.
1	Percentage removal of nickel by live and dead bacterial isolates from different concentrations of nickel electroplating effluent	60
2	Percentage removal of nickel by live and dead fungal isolates from different concentrations of nickel electroplating effluent	62
3	Percentage removal of nickel by the dead bacterial isolates at different pH	66
4	Percentage removal of nickel by the dead fungal isolates at different pH	68
5	Percentage removal of nickel by the dead bacterial isolates at different temperatures	70
6	Percentage removal of nickel by the dead fungal isolates at different temperatures	72
7	Percentage removal of nickel by dead bacterial isolates at different incubation time (hours)	74
8	Percentage removal of nickel by dead fungal isolates at different incubation time (days)	75

## LIST OF PLATES

Plate No.	Title	Page No.
I A	Electroplating bath used in the process of nickel electroplating	37
I B	Point of discharge of nickel electroplating effluent	37
II	Experimental set up for plant growth studies	46
III	<i>Clarias gariepinus</i> – Experimental Fish	49
IV	Acclimatization of <i>Clarias gariepinus</i>	49
V	Experimental set up for fish growth studies	50
VI	Metal tolerant bacterial isolates identified from the soil contaminated with nickel electroplating effluent	55
VII	Metal tolerant fungal isolates identified from the soil contaminated with nickel electroplating effluent	58
VIII	Scanning electron micrographs depicting the effect of nickel on the cell morphology at different magnifications	78
	A – Scanning electron micrographs of <i>A. niger</i> before biosorption	78
	B – Scanning electron micrographs of <i>A. niger</i> after biosorption	78

IX	Biosorption of nickel by <i>Aspergillus niger</i>	81
X	Shoot and root lengths of 7 days old green gram seedlings emerged from different treatments	96
XI	Shoot and root length of 30 days old green gram plants grown in different treatments	101
XII	Shoot and root length of 60 days old green gram plants grown in different treatments	101
XIII	Histology of gills of <i>Clarias gariepinus</i>	140
XIV	Histology of liver of <i>Clarias gariepinus</i>	142
XV	Histology of kidney of <i>Clarias gariepinus</i>	144

---

## LIST OF APPENDICES

---

Appendix No.	Title
1	Biochemical tests for the identification of bacteria
2	Lacto phenol cotton blue staining
3	Physicochemical characterisation of the effluent
4	Biochemical parameters of plant and fish samples
5	Biochemical analysis in the soil samples

---
