

## TABLE OF CONTENTS

| CHAPTER NO. | TITLE   | PAGE NO.  |
|-------------|---|-----------|
| <b>1.</b>   | <b>Introduction</b>                                     | <b>1</b>  |
|             | 1.1. Introduction                                       | 1         |
|             | 1.2. Supercapacitors                                    | 1         |
|             | 1.3. Categories of Supercapacitors                      | 3         |
|             | 1.3.1. Carbon-based electrodes                          | 4         |
|             | 1.3.1.1. Graphene                                       | 5         |
|             | 1.3.1.2. Carbon nanotubes                               | 5         |
|             | 1.3.1.3. Activated carbon                               | 6         |
|             | 1.3.2. Transition Metal Oxides                          | 6         |
|             | 1.3.2.1. Binary Transition metal oxides                 | 7         |
|             | 1.3.2.2. Spinel structure                               | 7         |
|             | 1.3.2.3. Spinel structured Cobaltites                   | 9         |
|             | 1.4. Separators   | 9         |
|             | 1.5. Electrolytes                                       | 9         |
|             | 1.5.1 Solid state electrolytes                          | 10        |
|             | 1.6. Need of the research work                          | 11        |
|             | 1.6.1. Objectives                                       | 11        |
|             | 1.6.2. Methodology                                      | 11        |
| <b>2.</b>   | <b>Review of Literature</b>                             | <b>12</b> |
|             | 2.1. Introduction                                       | 12        |
|             | 2.2. Review on Carbon                                   | 12        |
|             | 2.3. Review on Zinc Cobaltite                           | 20        |
|             | 2.4. Summary  | 30        |
| <b>3.</b>   | <b>Materials and Methods</b>                            | <b>31</b> |
|             | 3.1. Introduction                                       | 31        |
|             | 3.2. Chemicals/materials used                           | 31        |
|             | 3.3. Synthesis of Carbon by Conventional Heating Method | 33        |
|             | 3.4. Plasma firing method                               | 34        |
|             | 3.5. Sol-gel method                                     | 34        |

| CHAPTER NO. | TITLE  | PAGE NO.  |
|-------------|--|-----------|
|             | 3.6. Characterization of prepared material   | 35        |
|             | 3.6.1. Structural Characterization   | 35        |
|             | 3.6.1.1. X-Ray Diffraction   | 35        |
|             | 3.6.1.2. Raman Spectroscopy  | 36        |
|             | 3.6.1.3. Field Emission Scanning Electron Microscopy   | 36        |
|             | 3.6.1.4. Transmission Electron Microscopy  | 36        |
|             | 3.6.1.5. Elemental Analysis  | 36        |
|             | 3.6.1.6. Surface Area Analysis   | 36        |
|             | 3.7. Working Electrode Preparation   | 37        |
|             | 3.8. Device assembly   | 37        |
|             | 3.8.1. Electrochemical Characterizations   | 39        |
|             | 3.8.2. Cyclic Voltammetry (CV)   | 39        |
|             | 3.8.3. Galvanostatic Charge-Discharge Analysis   | 40        |
|             | 3.8.4. Electrochemical Impedance Spectroscopy  | 41        |
|             | 3.9. Summary   | 42        |
| <b>4.</b>   | <b>Characterization of Carbon from the Stick of <i>P. juliflora</i> by Conventional Heating Method</b> | <b>43</b> |
|             | 4.1. Introduction  | 43        |
|             | 4.2. X-Ray Diffraction analysis of S-Carbon  | 44        |
|             | 4.3. Raman analysis of S-Carbon  | 45        |
|             | 4.4. FESEM analysis of S-Carbon  | 47        |
|             | 4.5. HR-TEM analysis of S-Carbon   | 49        |
|             | 4.6. Elemental analysis of S-Carbon  | 50        |
|             | 4.7. BET surface area analysis of S-Carbon   | 52        |
|             | 4.8. Electrochemical analysis of S-Carbon  | 54        |
|             | 4.8.1. Cyclic Voltammetry analysis of S-Carbon   | 54        |
|             | 4.8.2. Galvanostatic Charge-Discharge analysis of S-Carbon   | 56        |
|             | 4.8.3. Electrochemical Impedance analysis of S-carbon  | 58        |
|             | 4.9. Summary   | 61        |
| <b>5.</b>   | <b>Characterization of Carbon from the Bark of <i>P. juliflora</i> by Conventional Heating Method</b>  | <b>62</b> |
|             | 5.1. Introduction  | 62        |

| CHAPTER NO. | TITLE  | PAGE NO.  |
|-------------|--|-----------|
|             | 5.2. X-Ray Diffraction analysis of B-Carbon  | 62        |
|             | 5.3. Raman analysis of B-Carbon  | 62        |
|             | 5.4. FESEM analysis of B-Carbon  | 64        |
|             | 5.5. HR-TEM analysis of B-Carbon   | 65        |
|             | 5.6. Elemental analysis of B-Carbon  | 67        |
|             | 5.7. BET surface area analysis of B-Carbon   | 68        |
|             | 5.8. Electrochemical analysis of B-Carbon  | 70        |
|             | 5.8.1. Cyclic Voltammetry analysis of B-Carbon   | 70        |
|             | 5.8.2. Galvanostatic Charge-Discharge analysis of B-Carbon                                 | 71        |
|             | 5.8.3. Electrochemical Impedance analysis of B-Carbon                                      | 74        |
|             | 5.9. Summary   | 75        |
| <b>6.</b>   | <b>Characterization of Carbon from the Bark of <i>P. juliflora</i> by Plasma Synthesis</b> | <b>76</b> |
|             | 6.1. Introduction  | 76        |
|             | 6.2. X-Ray Diffraction analysis of PB-Carbon   | 76        |
|             | 6.3. Raman analysis of PB-Carbon   | 77        |
|             | 6.4. FESEM analysis of PB-Carbon   | 78        |
|             | 6.5. HRTEM analysis of PB-Carbon   | 79        |
|             | 6.6. Elemental analysis of PB-Carbon   | 81        |
|             | 6.7. BET surface area analysis of PB-Carbon  | 83        |
|             | 6.8. Electrochemical analysis of PB-Carbon   | 84        |
|             | 6.8.1. Cyclic Voltammetry analysis of PB-Carbon  | 84        |
|             | 6.8.2. Galvanostatic Charge-Discharge analysis of PB-Carbon                                | 85        |
|             | 6.8.3. Electrochemical Impedance analysis of PB-Carbon                                     | 87        |
|             | 6.9. Summary   | 89        |
| <b>7.</b>   | <b>Analysis of pure ZnCo<sub>2</sub>O<sub>4</sub> Electrode Material</b>                   | <b>90</b> |
|             | 7.1. Introduction  | 90        |
|             | 7.2. X-Ray Diffraction analysis of ZnCo <sub>2</sub> O <sub>4</sub>                        | 90        |
|             | 7.3. Raman analysis of ZnCo <sub>2</sub> O <sub>4</sub>                                    | 93        |

| <b>CHAPTER NO.</b> | <b>TITLE</b>   | <b>PAGE NO.</b> |
|--------------------|--|-----------------|
|                    | 7.4. FESEM analysis of ZnCo <sub>2</sub> O <sub>4</sub>                                  | 94              |
|                    | 7.5. Elemental analysis of ZnCo <sub>2</sub> O <sub>4</sub>                              | 95              |
|                    | 7.6. Electrochemical analysis of ZnCo <sub>2</sub> O <sub>4</sub>                        | 96              |
|                    | 7.6.1. Cyclic Voltammetry analysis of ZnCo <sub>2</sub> O <sub>4</sub>                   | 96              |
|                    | 7.6.2. Galvanostatic Charge-Discharge analysis of ZnCo <sub>2</sub> O <sub>4</sub>       | 98              |
|                    | 7.6.3. Electrochemical Impedance analysis of ZnCo <sub>2</sub> O <sub>4</sub>            | 101             |
|                    | 7.7. Summary   | 102             |
| <b>8.</b>          | <b>Analysis of Fe,Cr:ZnCo<sub>2</sub>O<sub>4</sub></b>                                   | <b>104</b>      |
|                    | 8.1. Introduction  | 104             |
|                    | 8.2. X-Ray Diffraction analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                | 104             |
|                    | 8.3. Raman analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                            | 107             |
|                    | 8.4. FESEM analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                            | 109             |
|                    | 8.5. Elemental analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                        | 109             |
|                    | 8.6. Electrochemical properties of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                | 110             |
|                    | 8.6.1. Cyclic Voltammetry analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>             | 110             |
|                    | 8.6.2. Galvanostatic Charge-Discharge analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub> | 112             |
|                    | 8.6.3. Electrochemical Impedance analysis of Fe,Cr:ZnCo <sub>2</sub> O <sub>4</sub>      | 113             |
|                    | 8.7. Summary   | 115             |
| <b>9.</b>          | <b>Analysis of Ni,Cr:ZnCo<sub>2</sub>O<sub>4</sub></b>                                   | <b>116</b>      |
|                    | 9.1. Introduction  | 116             |
|                    | 9.2. X-Ray Diffraction analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                | 116             |
|                    | 9.3. Raman analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                            | 119             |
|                    | 9.4. FESEM analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                            | 120             |
|                    | 9.5. Elemental analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                        | 121             |
|                    | 9.6. Electrochemical properties of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>                | 122             |
|                    | 9.6.1. Cyclic Voltammetry analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>             | 122             |
|                    | 9.6.2. Galvanostatic Charge-Discharge analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub> | 123             |

| <b>CHAPTER NO.</b> | <b>TITLE</b>   | <b>PAGE NO.</b> |
|--------------------|--|-----------------|
|                    | 9.6.3. Electrochemical Impedance analysis of Ni,Cr:ZnCo <sub>2</sub> O <sub>4</sub>  | 125             |
|                    | 9.7. Summary   | 127             |
| <b>10.</b>         | <b>Symmetric Supercapacitor Assembly and analysis of electrochemical performance</b>   | <b>128</b>      |
|                    | 10.1. Introduction   | 128             |
|                    | 10.2. Symmetric supercapacitor configurations  | 128             |
|                    | 10.2.1. Electrochemical analysis of constructed symmetric supercapacitors with prepared carbons  | 128             |
|                    | 10.2.2. Kinetic analysis of the device using cyclic voltammograms  | 129             |
|                    | 10.3. Electrochemical analysis of constructed symmetric supercapacitor devices of undoped and doped ZnCo <sub>2</sub> O <sub>4</sub>                 | 142             |
|                    | 10.4 Summary   | 153             |
| <b>11.</b>         | <b>Asymmetric Supercapacitor Assembly and analysis of electrochemical performance</b>  | <b>155</b>      |
|                    | 11.1. Introduction   | 155             |
|                    | 11.2. Asymmetric supercapacitor configuration  | 155             |
|                    | 11.2.1. Electrochemical performance of asymmetric device with the configuration of S-Carbon with undoped and doped ZnCo <sub>2</sub> O <sub>4</sub>  | 155             |
|                    | 11.2.2. Electrochemical performance of asymmetric device with the configuration of B-Carbon with undoped and doped ZnCo <sub>2</sub> O <sub>4</sub>  | 169             |
|                    | 11.2.3. Electrochemical performance of asymmetric device with the configuration of PB-Carbon with undoped and doped ZnCo <sub>2</sub> O <sub>4</sub> | 180             |
|                    | 11.2.4 Flexible asymmetric supercapacitor  | 192             |
|                    | 11.3. Summary  | 197             |
| <b>12.</b>         | <b>Summary and Conclusion</b>  | <b>199</b>      |
|                    | <b>Bibliography</b>  | <b>202</b>      |
|                    | <b>Publications</b>  |                 |
